

13th International Symposium
on Endovascular Therapeutics

Session 24

Thoracic Aorta SITE^{update}

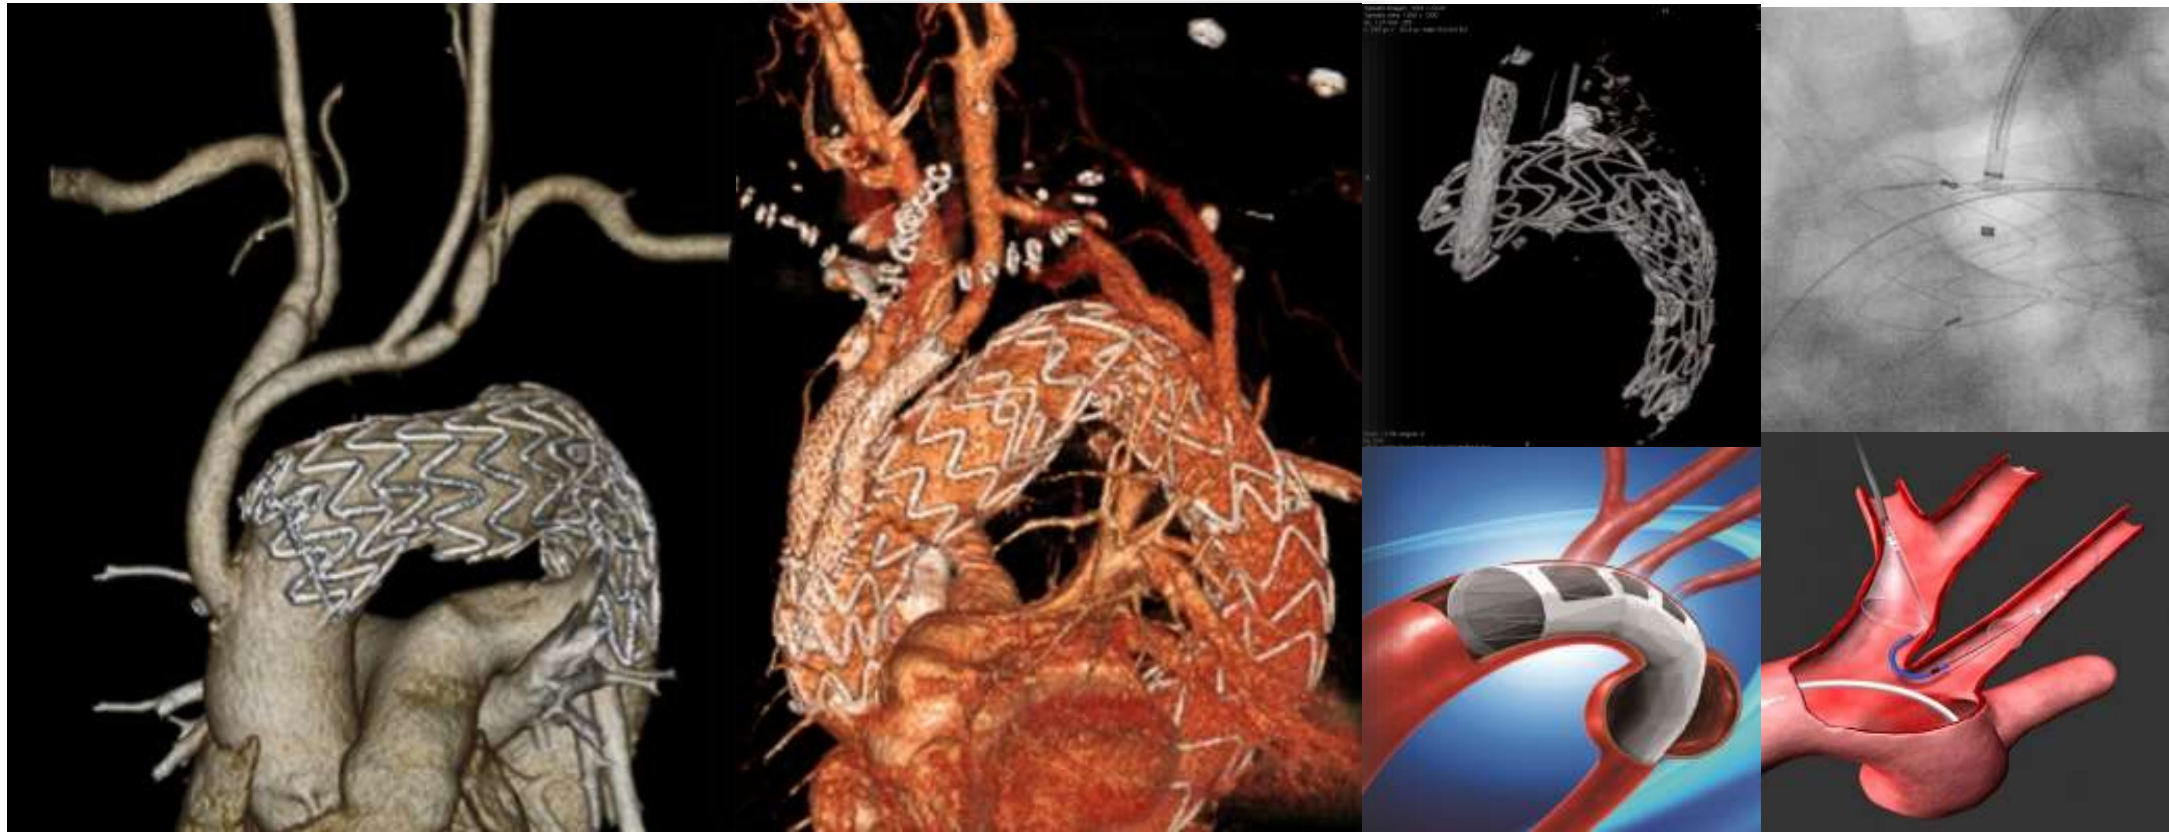

13th International Symposium
on Endovascular Therapeutics

1. Can we imagine nowadays a full endovascular ascending aorta replacement?
2. Endovascular repair of the arch: single vs dual branched vs fenestrations vs rerouting or debranching
3. Are the current thoracic endografts ideal enough for the aortic dissection treatment?
4. What should we do to make TEVAR NICER than EVAR?
5. Is TEVAR centralization still needed?

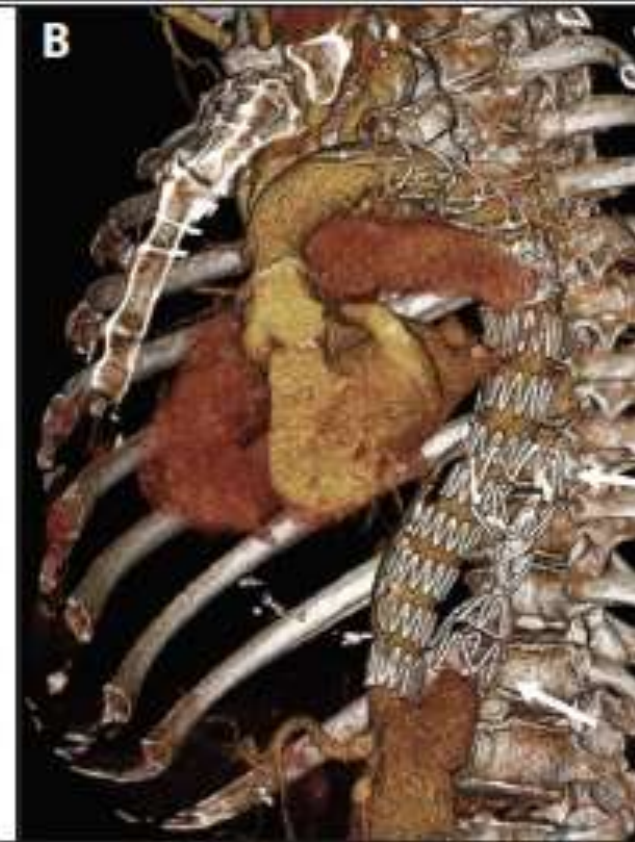

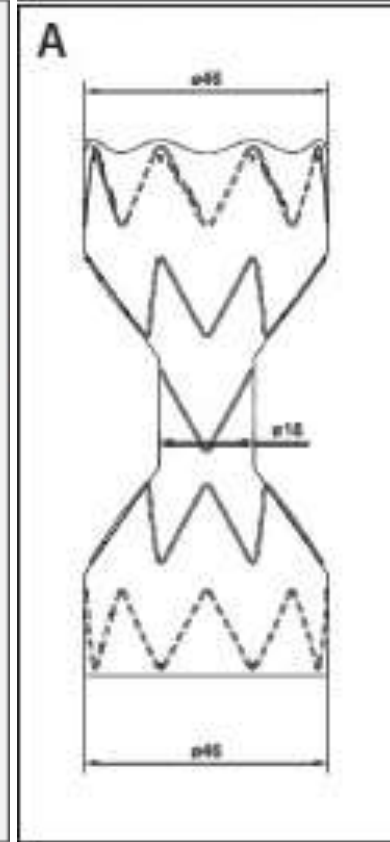

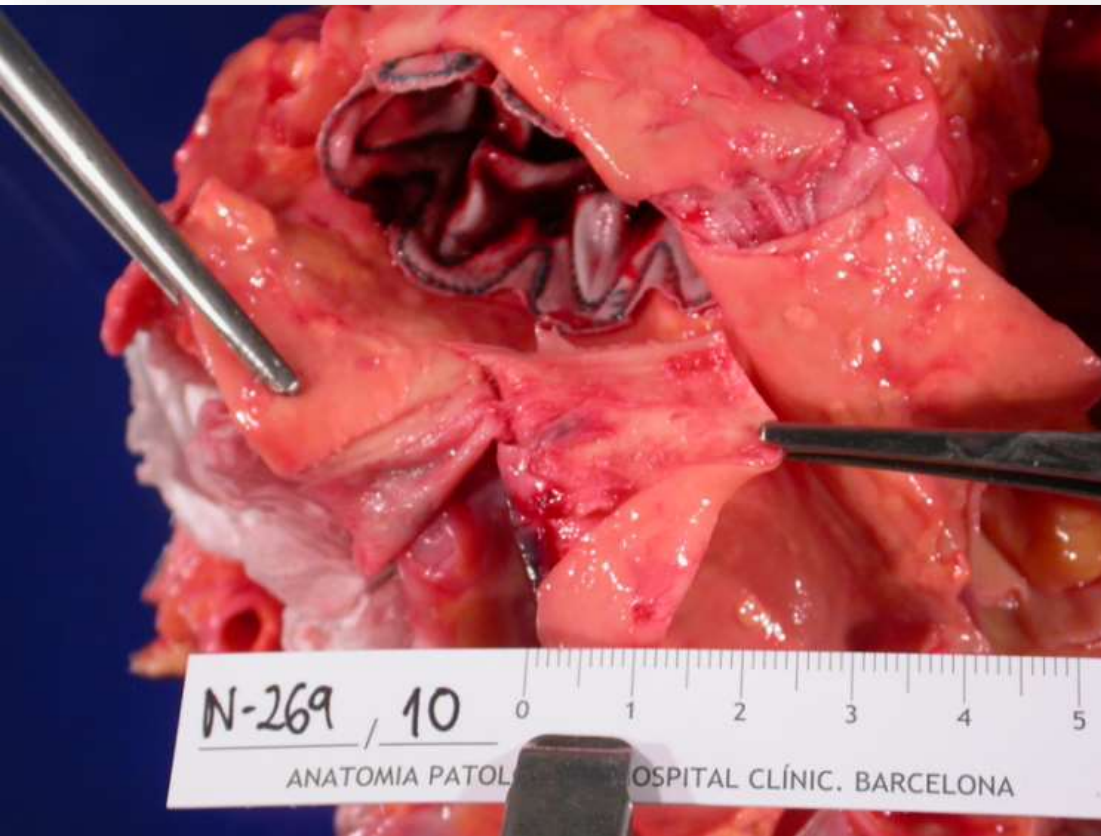

1. Can we imagine nowadays a full endovascular ascending aorta replacement?
