Future career development in space - Which skills will matter?

Organised by Women in Geospatial (@geospatialwomen)

Session details

Date	Tuesday, 13 May 2019
Time	3-4 pm
Location	ESA Agora

Session description

This session highlights different aspects of what skills are essential for succeeding in the space and geospatial sector. Join us when Amanda Reagan from ESA will show us how a better understanding of our own perspective is essential for our future career development. Amanda's talk will be followed by a panel discussion with five geospatial and space experts discussing essential career skills across the career ladder.

Additionally, some community efforts such as the newly founded Women in Geospatial network and the FOSS4G 2019 conference will be presented.

This session is organised by the newly founded network Women in Geospatial and we invite everyone to this session (men and women), who would like to join us in discussing different career development paths in the space sector.

Programme

Time	Title	Presenter
15:00 - 15:05	Welcome and setting the scene	Julia Wagemann
