

ESA EO Φ -WEEK 2020

28 September – 02 October 2020 | Virtual Event

To view all e-Poster presentations and interact with the authors during the dedicated sessions (**whole week 16:30 - 18:00**), please [register](#) to the event. Please note that each theme will have its dedicated day for live interaction with authors.

All e-Posters will be available on the [YouTube Playlist](#).

Poster ID	Title	First Author
LIVE INTERACTION WITH AUTHORS: Monday 28 September 2020		
Commercial Products, Projects, Initiatives		
77	Svalbard Integrated Arctic Earth Observing System (SIOS) supported Earth observation (EO) and Remote Sensing (RS) activities in Svalbard	Shridhar Jawak
93	An Intro Into the Rapid Revisit and High Resolution SkySat Solutions	Rhodri Phillips
116	Next Generation Analysis Ready Data from Planet	Rasmus Houborg
194	The Earth Observation for Sustainable Development Lab (EO4SD Lab): leveraging Copernicus and cloud-computing to promote uptake of geospatial data by the Development Assistance Sector	Clive Farquhar
248	Lumen - a Family of Small High-end Earth Observation Instruments	Jos Dingjan
249	MAFIS (Multiple Actors Forest Information System): EO, AI and ODC for scalable forest monitoring services	Marcello Maranesi
257	Cybersecurity For Space	Michel Averseng
Education, Citizen Science		
125	The Crowd2Train Project: a New Innovative Way to Rapidly Label Crop Types Using Street Level Photography	Steffen Fritz
170	Citizens and Satellites – Multisource Monitoring of Urban Sprawl in Context of Climate Change Adaptation based on Remotely Sensed Time Series and Crowdmapping in German Metropolitan Regions	Gohar Ghazaryan
175	EO4GEO training modules implementation on Remote Sensing, Geohazard and Cultural Heritage: the Baia Archaeological Park case study	Federica Ferrigno
229	EO4GEO: A Strategy for Skills Development in the Space / Geospatial Sector	Silvia Gorni
259	Improving Earth Observation accessibility – trends, challenges, and opportunities for new and existing users using computer programming	Hayley Evers-King
EO Applications - PART 1		
15	Floodscan-DTX: Digital Twin eXperiment of an onboard AI flood mapper for operational SAR satellites	Guy Schumann
22	Generation and Manipulation of Earth Observation Images for Modeling and Augmentation	Ron Hagensieker
26	Integrating satellite imagery and climate data to predict sugarcane yield at the field level in Australia using machine learning	Catherine Ticehurst
27	Crop Identification by Merging Time Series of Sentinel-1 and Sentinel-2 Images	Beatrice Gottardi
29	euPOLIS - Integrated NBS-Based Urban Planning Methodology for Enhancing the Health and Well-Being of Citizens	Vasiliki Charalampopoulou
42	CRITE: exploitation of multi-temporal and multi-sensor EO images with artificial intelligent techniques to map and characterise shadowed coffee plantations in Timor-Leste	Giulio Ceriola
44	CNN-Based Building Footprint Detection From Remote Sensing Imagery	Andrea Rapuzzi
49	Open Data Cube and Deep Learning to Exploit Earth Observation Data for Precipitation Estimation Over Ghana in the Schools and Satellites CSEOL Project	Mónica Estébanez Camarena
52	Fully convolutional neural networks for mangrove extent mapping	Alireza Taravat
54	EOLAW, EO derived information in support of Law Enforcement - COVID19 impact on Waste disposal levels service	Dimitris Bliziotis
58	Deep Learning and Data Fusion for Cloud Removal from Sentinel-2 Images	Michael Schmitt
62	Comparative study of Neural networks and machine learning models for Winter Wheat crop classification in Denmark	Adithya Jairam Iyer
73	Crop Type Detection Using Deep Learning within the eo-learn library	Hugo Fournier
74	Deep Learning Methods Applied to Earth-Observation Satellite Vibrations detection	Hugo Fournier
76	Deriving Image Statistics and Cloud Coverage Using Google Earth Engine	Emmanuel Hillairet
82	Cloud detection algorithm based on an auto-encoder Convolutional Neural Network	Nuria Duran Gomez
84	The H2020 project e-shape Pilot 5.5 Monitoring fishing activity	Marc Cloarec
87	Agricultural Monitoring Using SAR-Data	Damian Bargiel
89	Extreme event management	Jean-christophe Poisson
91	Towards a Bio-Compatible Economy - Proposal for a Novel Paradigm	Elizabeth Everson

96	The role of satellite data for the National Forest Monitoring systems in the context of international climate reporting: state of the art and roadmap	Inge G.C. Jonckheere
97	Procedure Outline for Desert Sand Dunes Displacement Detection Through Time-Series Analysis of Sentinel-2 Imagery	Daniele Oxoli
101	Timely land cover mapping at global scale: challenges and opportunities	Ruben Van De Kerchove
105	Harnessing Sentinel 1 to train crop growth models for real time forecasting	Pierre Stratonovitch
107	Synergistic use of multispectral data and crop growth model: a comparison of ET estimations.	Paolo Cosmo Silvestro
109	The ESA ARTES Demonstration Project "Saturnalia": forecasting wine quality from space seemed impossible, it is now an operational downstream service	Daniele De Vecchi
112	YPSILON – Yield Prediction by Satellite – Big Data Processing to Implement a Europe-Wide Information Service using Sentinel-2 Data and High-Resolution Simulations	Silke Migdall
113	Breaking the behavioural barrier to nature-based innovation in Baia Mare: EO and Blockchain for the urban ecosystem of the future	Sorin POP
117	Crop Type Monitoring using Deep Learning Models on the Food Security TEP within H2020 Extreme Earth	Florian Appel
119	COVID-19 digital twin, an interactive map for NASA SpaceApps	Gianfausto Bottini
124	Digitally twinning the built environment	Karolien Vermeiren
127	Crop Classification With Fusion Data: Leveraging Sentinel-1 and -2 With Spatio-Temporal Deep Learning	Mathis Lamarre
139	BEACON. Using a Satellite Drought Indicator for Drought Damage Classification and Parcel Based Crop Loss Assessment	Emmanuel Lekakis
141	Analysis and mapping of groundwater points and households in Malawi TA Mazengera region using open source aerial images	Liliane Kissita
146	CORTEX: Open training datasets of Sentinel images : ships (Sentinel-2) and refugee camps detection (Sentinel-1&2)	Adrien Lagrange
LIVE INTERACTION WITH AUTHORS: Tuesday 29 September 2020		
AI4EO Methods, Algorithms - PART 1		
31	Intelligent Sampling for Retrieval of Crop Characteristics With Active Learning	Katja Berger
33	Detection and Segmentation of Possible Oil-Spills in Marine Environment	Omjyoti Dutta
38	An Introduction to Deep Learning with CNNs Applied on Earth Observation Data	Thorsten Hoeser
40	Geophysical Reference Data for Machine Learning (GRD4ML)	Daniele Latini
41	Guided AI for for interactive semantic segmentation	Gaston Lenczner
50	Boundary delineation of agricultural fields by mean of convolutional neural networks	Alireza Taravat
51	ResU-Net model development for salt marsh algal mats detection: case study southern England	Alireza Taravat
53	Taking VHR Satellite Imagery from Information to Insight	Maria Hochleitner
55	Gated Graph Convolutional Neural Network With Deep Structured Feature Embedding for Building Extraction	Yilei Shi
65	Using machine learning to automatically detect satellite manoeuvres in space : the great potential of Two-Line Elements (TLE)	Sandrine Daniel
70	AIREO: AI-Ready Earth Observation Training Datasets	Venkatesh Kannan
72	Conditional GAN for Ocean SAR Image Generation	Aurélien Colin
79	Enhancing Satellite Images resolution with enhanced SRGAN model on a Kubernetes cluster	Luis De Juan
88	Semi-Supervised Semantic Segmentation in Earth Observation: New Benchmark and Assessment of Training Data Representativeness	Javiera Castillo-Navarro
99	AIDE: Collaborative Large-Scale Image Annotation With Machine Learning and Humans in the Loop	Benjamin Kellenberger
100	Large scale crop classification using Sentinel 1 time series and a Long-short term memory network	Felix Reuß
115	Measuring Changes in Poverty With Deep Learning and Satellite Images	Lukas Kondmann
120	There Is No Data Like More Data - The SEN12MS Dataset and Its Derivatives	Michael Schmitt
121	A web App for Maritime Domain Awareness	Gianfausto Bottini
122	Multi-Scale Building Damage Assessment With Deep Neural Networks	Adrien Lagrange
123	Online Tool for Creation of Machine Learning Training Data from Satellite images	Matjaž Ivačić
131	Toward eliminating locational obstacle in remote sensing classification via domain adaptation	Jingliang Hu
137	CG-Net: Conditional GIS-aware Network for Individual Building Segmentation in VHR SAR Images	Yao Sun
140	Explainable Artificial Intelligence in Remote Sensing	Chandrabali Karmakar
147	DINCAE: multivariate convolutional neural network with error estimates to reconstruct gridded and along-track satellite observations	Alexander Barth
149	A High Throughput and Low Energy Data Processing Pipeline On-Board Software for Large Volumes of Data	Pablo Ghiglini
151	Benchmarking novel deep learning techniques in Earth Observation domain	Gianfausto Bottini

157	Denoising SAR data using Deep Learning: from design to applications	Jose Manuel Delgado Blasco
159	Visual Question Answering for Remote Sensing	Sylvain Lobry
163	Creation of a Large Sentinel-2 Cloud Masking Dataset	Alistair Francis
Earth Science		
56	OCRE: starting the Cloud and EO commercial services usage by the European research community	Jose Manuel Delgado Blasco
75	Svalbard Integrated Arctic Earth Observing System (SIOS)'s special issue on Earth Observation (EO) and Geoinformation (GI) activities in Svalbard	Shridhar Jawak
19	Space-Based Inference of Surface NO2 Concentrations in Megacities With TROPOMI Observations and Machine Learning	Hervé Petetin
21	Meaningful Labeling of Satellite Image Details: Recent Developments in Latent Dirichlet Allocation Topics	Corneliu Octavian Dumitru
46	Zero-Shot Cross-Modal Retrieval of VHR EO Sketch Images	Ushasi Chaudhuri
47	Deep Learning Specific for SAR Scattering Properties and Image Classification	Zhongling Huang
48	Mapping Vegetation Variables in Google Earth Engine Using Gaussian Process Regression Models	Matias Salinero
64	A Generic Spherical Spline Approximation Framework for the Earth Digital Twin	Matthieu Simeoni
68	Combination of Semi-Physical Models, In-Situ Data and Artificial Intelligence to Monitor Soil Moisture With Sentinel-1 and -2 Imagery	Marc Padilla
81	Uncertainty estimation via Neural Networks	Núria Duran Gomez
83	SatWebMare Project Results for Forecasting and Hindcasting of the Sea Storms Along the Bulgarian Black Sea Coast Using AI	Vasko Galabov
85	Systematic Assessment of Emulators for Atmospheric Correction in the O2A Absorption Band	Jorge Vicent Servera
102	Quantum Machine Learning for Earth Observation	Soronzonbold Otgonbaatar
110	Joint Active-Passive Sensing of Agricultural land combining L-, C- and X-band Radar Data: Preliminary Findings from Different Case Studies	Fabio Dell'Acqua
111	Interpretable CNNs for SAR Image Understanding	Juanping Zhao
138	Satellite detection of wastewater contamination in the Black Sea coastal areas	Irina Gancheva
160	Combining Segmentation and Edge-Detection for the Extraction of Antarctic Glacier Fronts	Konrad Heidler
173	Unsupervised Iceberg Detection in Copernicus Sentinel-1 Satellite Images Using Recurrent Principal Component Analysis	Anita Faul
189	TecVolSA: The Development of an Intelligent Sentinel-1 Data Exploitation System over Tectonics and Volcanoes in South America	Homa Ansari
233	Combining CryoSat-2 Swath Altimetry With Operation Ice Bridge and IceSat-2 – A Neural Network Approach	Alex Horton
234	CryoTEMPO-EOLIS: Elevation Over Land Ice from Swath	Martin Ewart
254	Convolutional Neural Networks for Automated Detection of ULF Waves in Swarm Time Series	Alexandra Antonopoulou
EO Platforms, Infrastructure - PART 1		
16	MLReef	Camillo Pachmann
17	The BRAT and GUT Couple: Broadview Radar Altimetry and GOCE User Toolboxes	Américo Ambrózio
18	SAR and SARin Altimetry Processing on Demand for Cryosat-2 and Sentinel-3 at ESA G-POD	Jérôme Benveniste
20	UrbanTEP – a Collaborative Work Environment for EO Service Providers, Urban Researchers and User Communities	Felix Bachofer
28	GEO-DAMP, the SatCen Geospatial Data Management Platform	Adrian Luna
34	WEKEO, the DIAS platform powered by EUMETSAT, ECMWF and MERCATOR OCEAN	Brice Mora
35	AIX in-orbit smart services	Leonardo Amoroso
36	Information-as-a-Service and new business models from satellite-based monitoring	Daniela Drimaco
37	COMET LiCSAR: An InSAR System for Measuring and Monitoring Global Tectonic and Volcanic Activity	Milan Lazecky
43	Leveraging Web Advanced Space Developer Interface (WASDI) for automated mapping of human settlements from Copernicus Sentinel data: a proof of concept in the framework of the Global Human Settlement Layer	Christina Corban
45	EOPEN: OPEN Interoperable Platform For Unified Access And Analysis Of Earth Observation Data	Leslie Gale
86	The Browse Processor (BRPF) - Python-based Earth Observation Satellites Data Visualization Software	Marcin Stelmaszyk
94	Targeting the Digital Twin Earth - how to acquire, store and distribute EO Data for efficient processing, analysis and distribution?	Stanisław Datek
103	Sentinel-1 and Sentinel-2 data fusion on the CANDELA cloud platform	Wei Yao
104	Forestry TEP Helps Managing Forest Resources and Carbon Globally	Tuomas Häme
LIVE INTERACTION WITH AUTHORS: Wednesday 30 September 2020		
EO Applications - PART 2		

152	SDG Indicator 11.3.2 as the Way for City Land Consumption Assessment Based on Satellite Data	Andrii Shelestov
156	Forecasting Water Volumes in Dams Based on Deep Learning Over Satellite Data	Mariana Damova
158	Copernicus High Resolution Layer 2018: introduction of a new product for pan-European mapping of buildings using Sentinel data	Antoine Masse
162	Mapping the Land Cover of Africa at 10 m Resolution from Multi-Source Remote Sensing Data with GoogleEarth Engine	Qingyu Li
179	An innovative approach to build Human Activity Indicators from Space and Non-Space data	Sara Barozzi
181	One year of satellite monitoring of subalpine lakes for SIMILE project	Giulia Luciani
187	urbAIIn - Artificial Intelligence for Digital Urban Twinning	Conrad Bielski
191	High resolution soil moisture retrieval from multi spatio-temporal scales EO data-driven models	Méïssande Machefer
192	Large-scale coastal erosion monitoring from SAR imagery over a 25-years time span	Méïssande Machefer
193	Sentinel-2 data analysis based on explainable features and exploratory visual analysis	Corina Vaduva
196	ExtremeEarth: The Polar Use Case	Alistair Everett
198	Oil Spill Detection from SAR Images by Adversarial Learning	Federico Ronci
199	A Bag-of-Words framework for natural disaster evaluation on Sentinel-2 image	Victor-Bogdan Bărbulescu
200	DNN for EO: Fast Training With Reduced Datasets	Iulia Calota
201	Perceptive Deep Sensing: Making Visual Multispectral Earth Observation Images	Iulia Coca (Neagoe)
203	Unsupervised Forest Cuts Detection in Amazonia Based on SAR Data	Giuseppe Scriva
204	Analyses of the Errors Characteristics in Land Cover Maps: Aggregation of Errors for Individual Land Cover Class Confusions	Gorica Bratic
209	Applying AI On EO To Enhance a Digital Twin Of the Built-Up Environment	Nicolas Matton
215	Building detection with SAR satellite images based on deep learning	Ryo Saito
217	Monitoring and Forecasting Potential Fishing Zones With the Use of Sentinel-3 Data	Spyros Spondylidis
218	OpenLitterMap - Open Data on Plastic Pollution with Blockchain Rewards (Littercoin)	Seán Lynch
224	Detecting moving vehicles in very-high resolution satellite imagery for monitoring dynamics of air pollution sources	Refiz Duro
226	Taking the pulse of our rainforests by fusing multitemporal Sentinel 1 and 2 data for advanced deep-learning	Melanie Brandmeier
231	Cloudy EO Time Series Restoration Tool	Pietro Fronte
236	EO4AGRI: Bringing Together the Knowledge for Better Agriculture Monitoring	Miguel Angel Esbri
242	Generating AI Ready Data from Sentinel-1 for Burned Area Mapping	James Wheeler
243	Detection and Characterization of Unidentified Aerospace Phenomena in the Near-Earth Space Environment using Satellite Data Imagery	Philippe Ailleris
247	Supporting Digital Twins Through Land Cover Classification	Samantha Lavender
252	Artificial Intelligence and Earth Observation Data: Innovative Methods for Monitoring West Nile Disease Spread in Italy	Carla Ippoliti
255	Sustainable Forestry for climate crisis mitigation and biodiversity conservation	Marcello Maranesi
256	Using multi-source satellite image series for a data-informed crop yield estimation at different management scales	Gohar Ghazaryan
260	Crop life cycle identification using SAR	Dominic Edmunds
265	Improved Mini-Grid Site Selection in Developing Countries using Village Data Analytics	Philippe Raisin
267	Spatial and temporal analysis of fire patterns and their determinants in Amazonia using open Earth Observation (EO) data	Minerva Singh
LIVE INTERACTION WITH AUTHORS: Thursday 01 October 2020		
AI4EO Methods, Algorithms - PART 2		
165	Generative AI for remote sensing	Otto Fabius
166	A Multi Modal Deep Learning Approach for Urban Poverty Mapping Using Remote Sensing and Auxiliary Data	Thomas Stark
167	RACE: Application of AI for Monitoring Economic Impact of COVID-19 in European Cities	Valerio Fontana
168	Buildings and roads extraction from satellite data	Gianfausto Bottini
174	Exploring the Super Resolution of satellite data using Deep Learning networks	Valerio Fontana
177	Look Ma, No Ground Truth! Extracting Value from Multi- and Hyperspectral Images Using Unsupervised Learning	Jakub Nalepa
178	Pan2Color: Deep Learning colorization of panchromatic images	Andrea Cavallini
182	Dynland technology for data classification	Romans Dinuls

186	Deep learning for super-resolution reconstruction of Sentinel-2 images	Michal Kawulok
190	Joint SAR-optical time series analysis for flood detection	Clément Rambour
197	Using AI in Large Scale EO-based Monitoring	Cornelis Valk
202	Facilitating the Use of Deep Learning Models for Remote Sensing Applications Through Automatic Hyperparameter Optimization	Nelly Rosaura Palacios Salinas
206	Uncertainties in So2Sat LCZ42 Classification Results by Convolutional Neural Networks	Syed Mohsin Ali
208	Synergic Use of Blockchain Technology and AI	Mihai Coca
220	Use of Domain Aware Machine Learning for Digital Twin Earth Applications	Gurbuz Taha Ozdemir
228	DATimeS: a new machine learning time series GUI toolbox for gap-filling of Earth observation data and crop monitoring	Santiago Belda
238	Geospatial Assessment of Urban Farming Potential in Metropolitan Areas	Pavan Muguda Sanjeevamurthy
EO Platforms, Infrastructure - PART 2		
106	Cloud-Hybrid EO platform services	Audrey Paccini
129	Earth Observation Video Analytics and Exploitation Platform	Chetan Pradhan
148	SAR2CUBE: A Data Cube Concept for Providing Both Interferometric and Intensity Based Products through an Open Source Framework	Alexander Jacob
154	HERMOSA - Supporting the UN Decade of Ecosystem Restoration Utilizing Geo- and Remote Sensing Technologies	Hinrich Paulsen
161	store4EO - an e-commerce platform for geoservices	Koushik Panda
164	BETTER - Big-data Earth observation Technology and Tools Enhancing Research and development	Nuno Grosso
172	A Common Architecture Supporting Interoperability in EO Exploitation	Philip Beavis
185	Evolution of the Polar Thematic Exploitation Platform	Andrew Fleming
195	Supporting the Portfolio Management for Micro-credits to Smallholder Farms in Kenya Through Crop Monitoring and Yield Prediction on the Food Security-TEP	Markus Muerth
211	Peta-Pixels United: the EarthServer Federation	Peter Baumann
219	Implementing the Massively-Parallel Change Detection Algorithm, BFAST-Monitor-GPU, in the Cloud Computing Platform SEPAL	Derek van de Ven
221	CSEOL in a Nutshell– Catalysing Citizen Science & Earth Observation to Address Societal Challenges	Uta Wehn
225	P-PRO - The Earth Console Parallel Processing Service	Roberta Pascale
227	Multi-providers Earth Observation data Access	Yasmine Boulfani
245	Cloud-Based Solutions for Automatic Monitoring of Agricultural Parcels in the Frame of the European Common Agricultural Policy	Hausala Shakya
246	OGEO-ReP: Oil Spill Response as a Case Study of Transitioning to an Operational Service	Phillip Harwood
258	METIS, the CS GROUP data intelligence Solution	Stephane Huriez
266	NextGEOSS - accelerating development of next generation Earth Observation services	Bente Lilja Bye
LIVE INTERACTION WITH AUTHORS: Friday 02 October 2020		
Sensors, Systems, Technology		
25	Earth Observation Expert System in the Era of Big Data: Security and Privacy	Alireza Taravat
32	AI Apps for EO	César Coelho
39	Space Data Gateway, a Smart NanoSat Communication service in LEO	Vito Fortunato
61	A Path To COTS Deployable Structures, Paving The Way To Advanced EarthObservation Nanosat Missions	Thomas Sinn
63	Science Data From Small Platforms - A View of What is Possible	Harbinder Rana
114	Prediction of Total Electron Content with Augmented Datasets by Generative Adversarial Networks	Cristian Damian
132	Advances in a Spaceborne Transmitter/Stationary Receiver Bistatic Configuration: A Smart Sensing Paradigm	Andrei Anghel
133	Identification of Wastewater CH4 Emission Sources Using Deep Learning Applied to Sentinel-2 Observations	Carlos Alberto Gomez Gonzalez
134	Sentinel-2 Harmonised Surface Reflectance Products with Sen2like. Phase 1 status.	Sébastien Saunier
135	Using Big Data Processing Facilities for Global Water Use Efficiency Derivation	Philipp Klug
136	Compressive sensing for monostatic and opportunistic bistatic synthetic aperture radar data	Adrian Focsa
145	CORTEX: Deep Learning processing for improving small sat capabilities	François De Vieilleville
150	Addressing the Small Satellite Data Bottleneck Through Innovations in Onboard Architectures & EO Data Processing	Rebecca Davidson
171	Advanced Data Chain Technologies for the Next Generation of Earth Observation Satellites Supporting On-Board Processing for Rapid Civil Alerts	Murray Kerr

180	Development of a Very High Resolution Payload for Small Satellites	Brent Brakeboer
188	Using Neural Architecture Search to improve GNSS single frequency ionospheric delay estimation	Benoît Stackler
207	Spaceborne Transmitter - Stationary Receiver: A Monostatic and Bistatic Dual-Polarimetric Investigation	Madalina Ciuca
212	OGC OAPI-Coverages: Evolution or Revolution?	Peter Baumann
237	On the Edge of Earth Observation	Pablo Ghiglino
263	A Hyperspectral Microwave Sounder on-board a Small Satellite Constellation for Climate Adaptation and Mitigation	Manju Henry
