

# ATMOS Discussion Day 5

Ed Malina, ESA/ESRIN, 05/05/2024

ESA UNCLASSIFIED – For ESA Official Use Only

- **How can we ensure measurements and projects undertaken at ESA can be taken up for wider climate policy? Potentially with the support of ESA-EC initiatives?**
- Synergies have been a key theme of this conference, are there some specific activities to support these types of activities, especially for ozone?
- With Sentinel 4 & 5 upcoming, what activities can we do to prepare for ozone exploitation? And how can we mitigate limb sounding gaps?
- Are there gaps in products for ESA CCI, that could be proposed as additional elements?
- What new scientific studies were missing from today's agenda, and what new studies should ESA support, what can we do to support the scientific exploitation and preparation for ALTIUS?
- At ATMOS we have presented key atmospheric pillars, GHGs, AQ, Aerosols/Clouds, Ozone and Dynamics, are there topics of atmospheric research that we are missing?
