

# ESA-JAXA Pre-Launch EarthCARE Science and Validation Workshop

13 – 17 November 2023 | ESA-ESRIN, Frascati (Rome), Italy

## EVID05: ACTRIS for EarthCARE L2 product evaluation

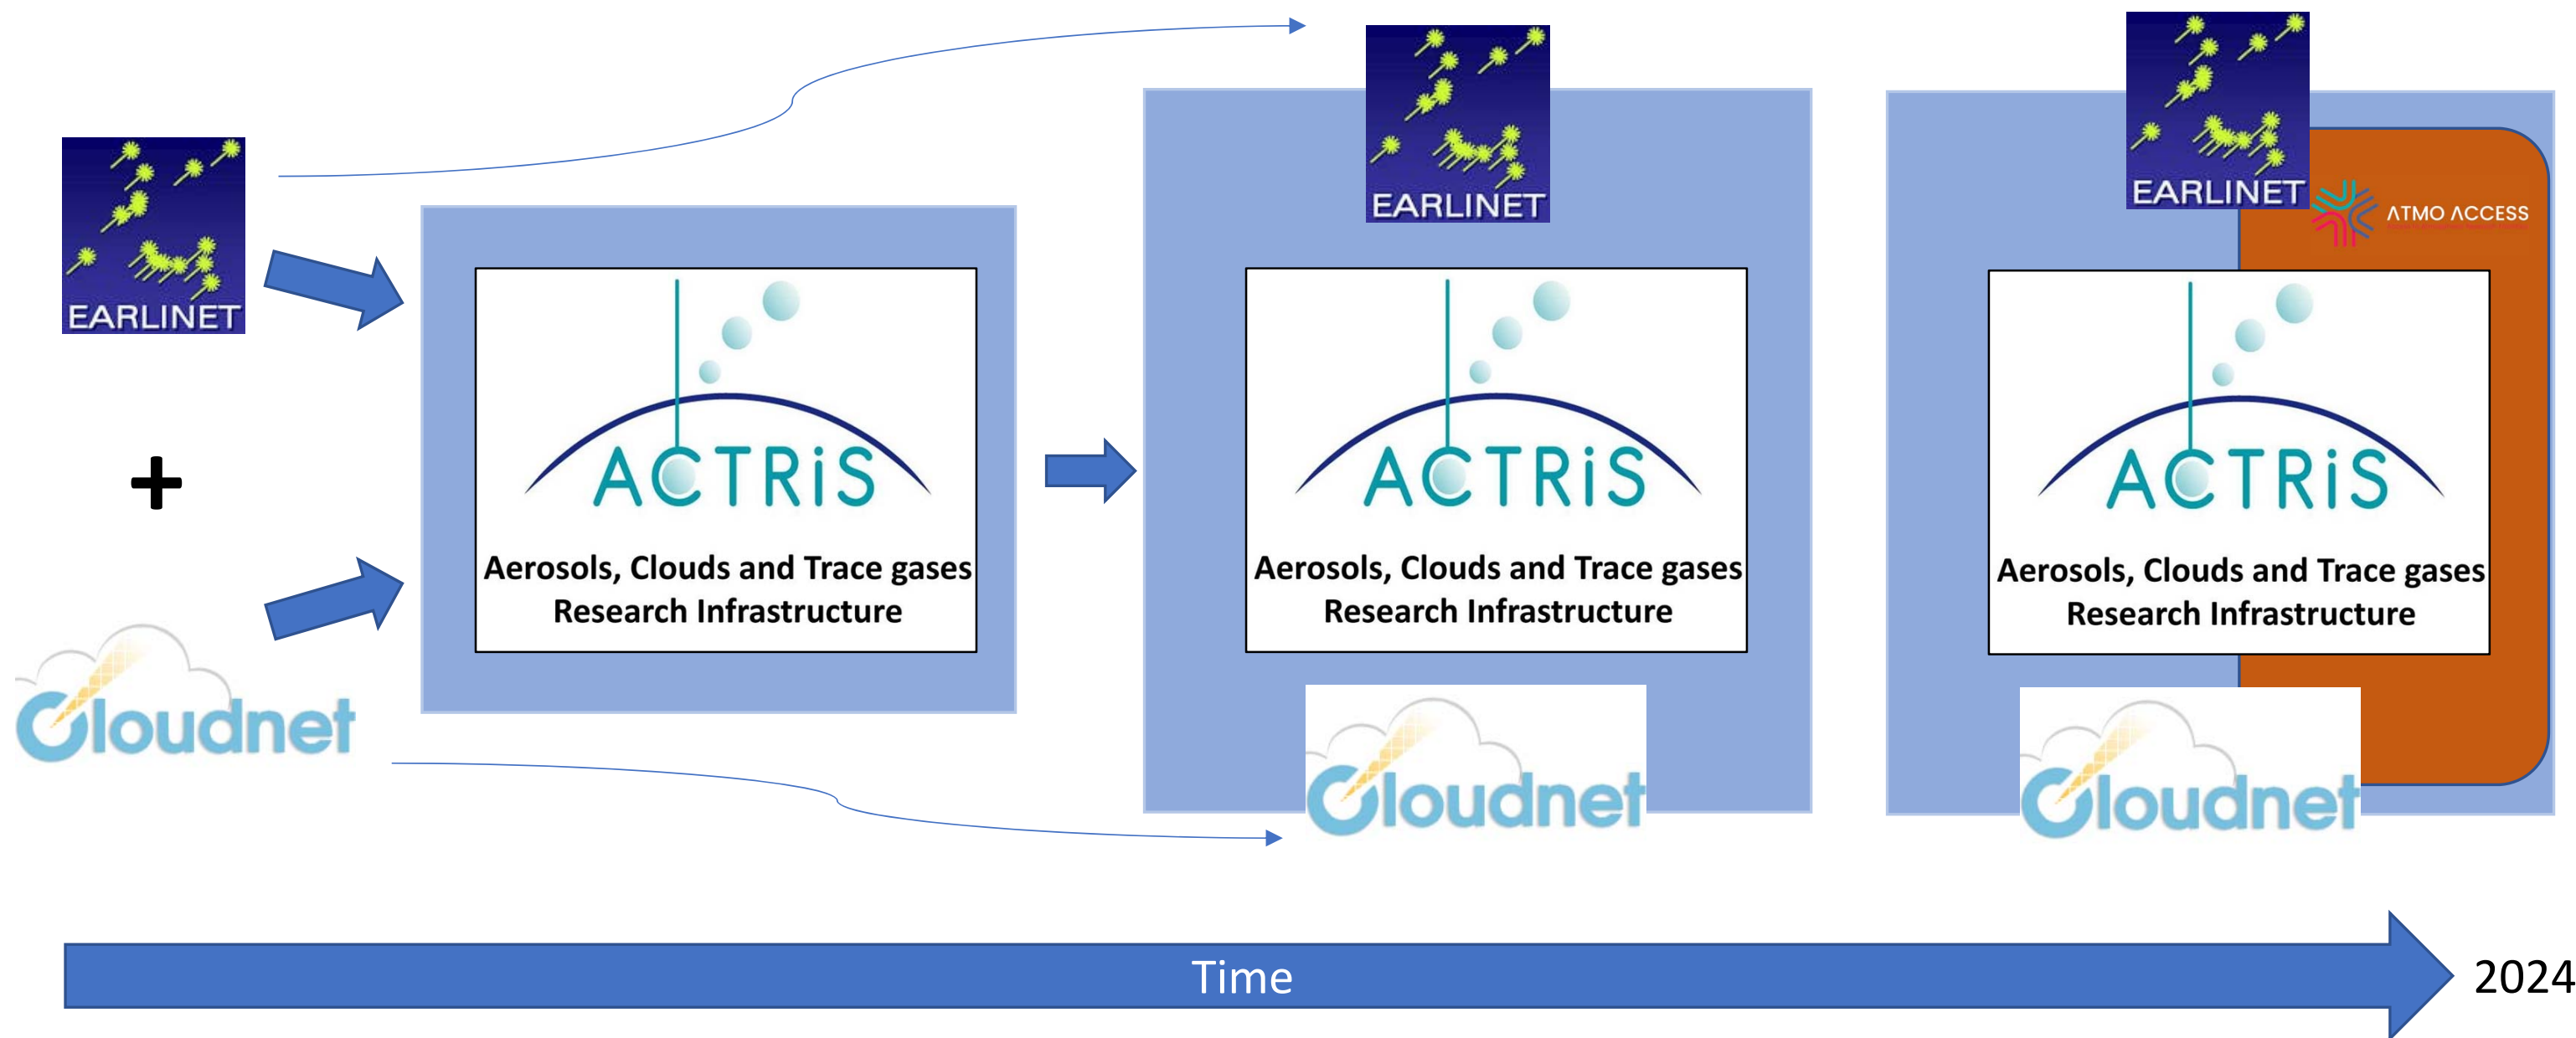

*Holger Baars, Eleni Marinou, Doina Nicolae, Lucia Mona, Ewan O'Connor, Martial Haeffelin, Arnoud Apituley, Ulla Wandinger on behalf of the ACTRIS, EARLINET, Cloudnet, and ATMO-ACCESS teams*

# Updates

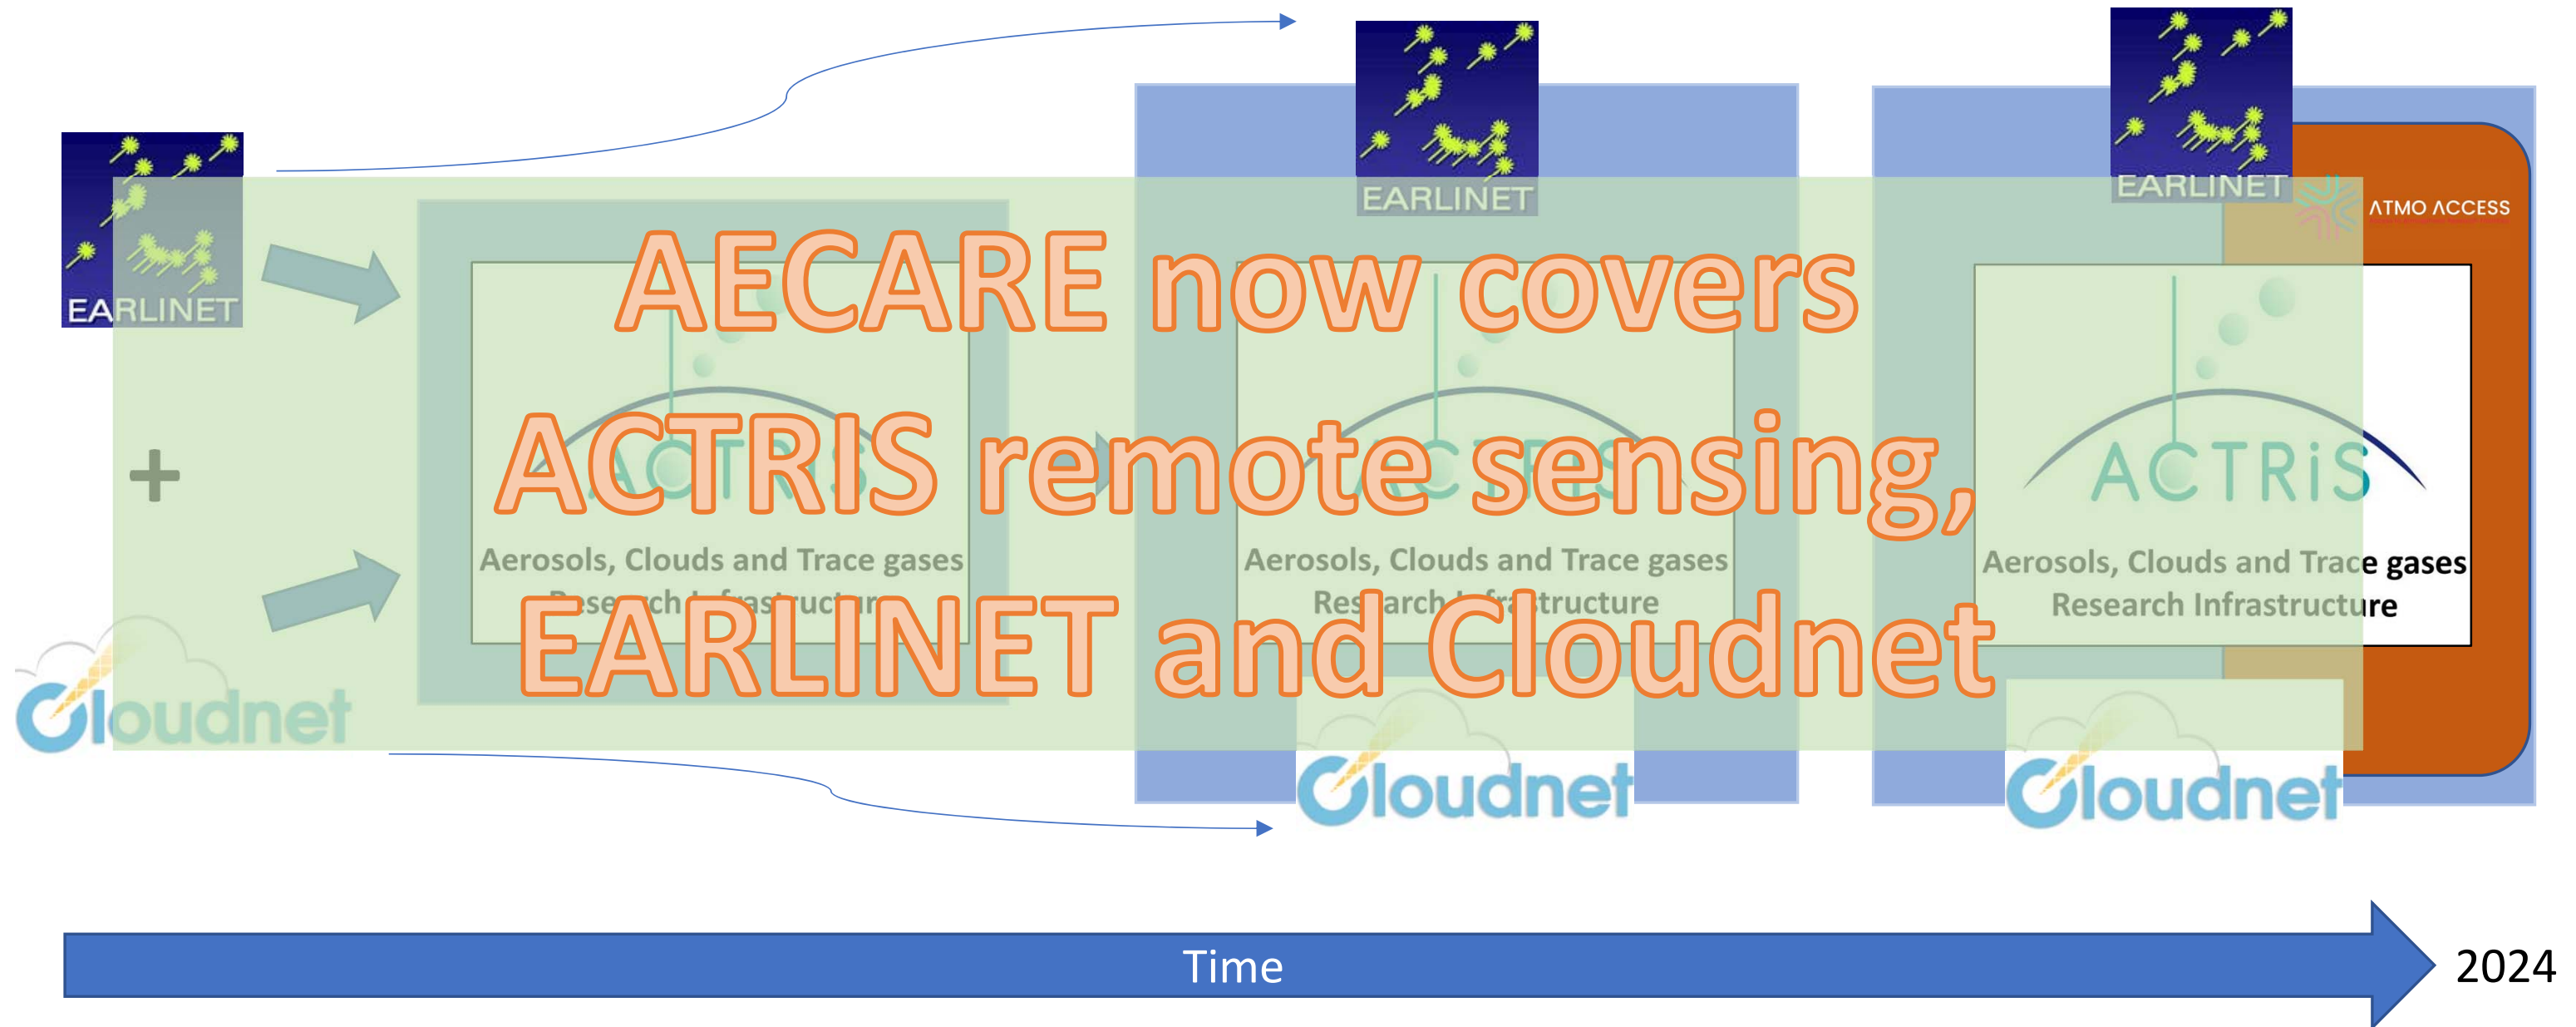

## Structural changes in the European research infrastructure landscape

# Updates

Structural changes in the European research infrastructure landscape

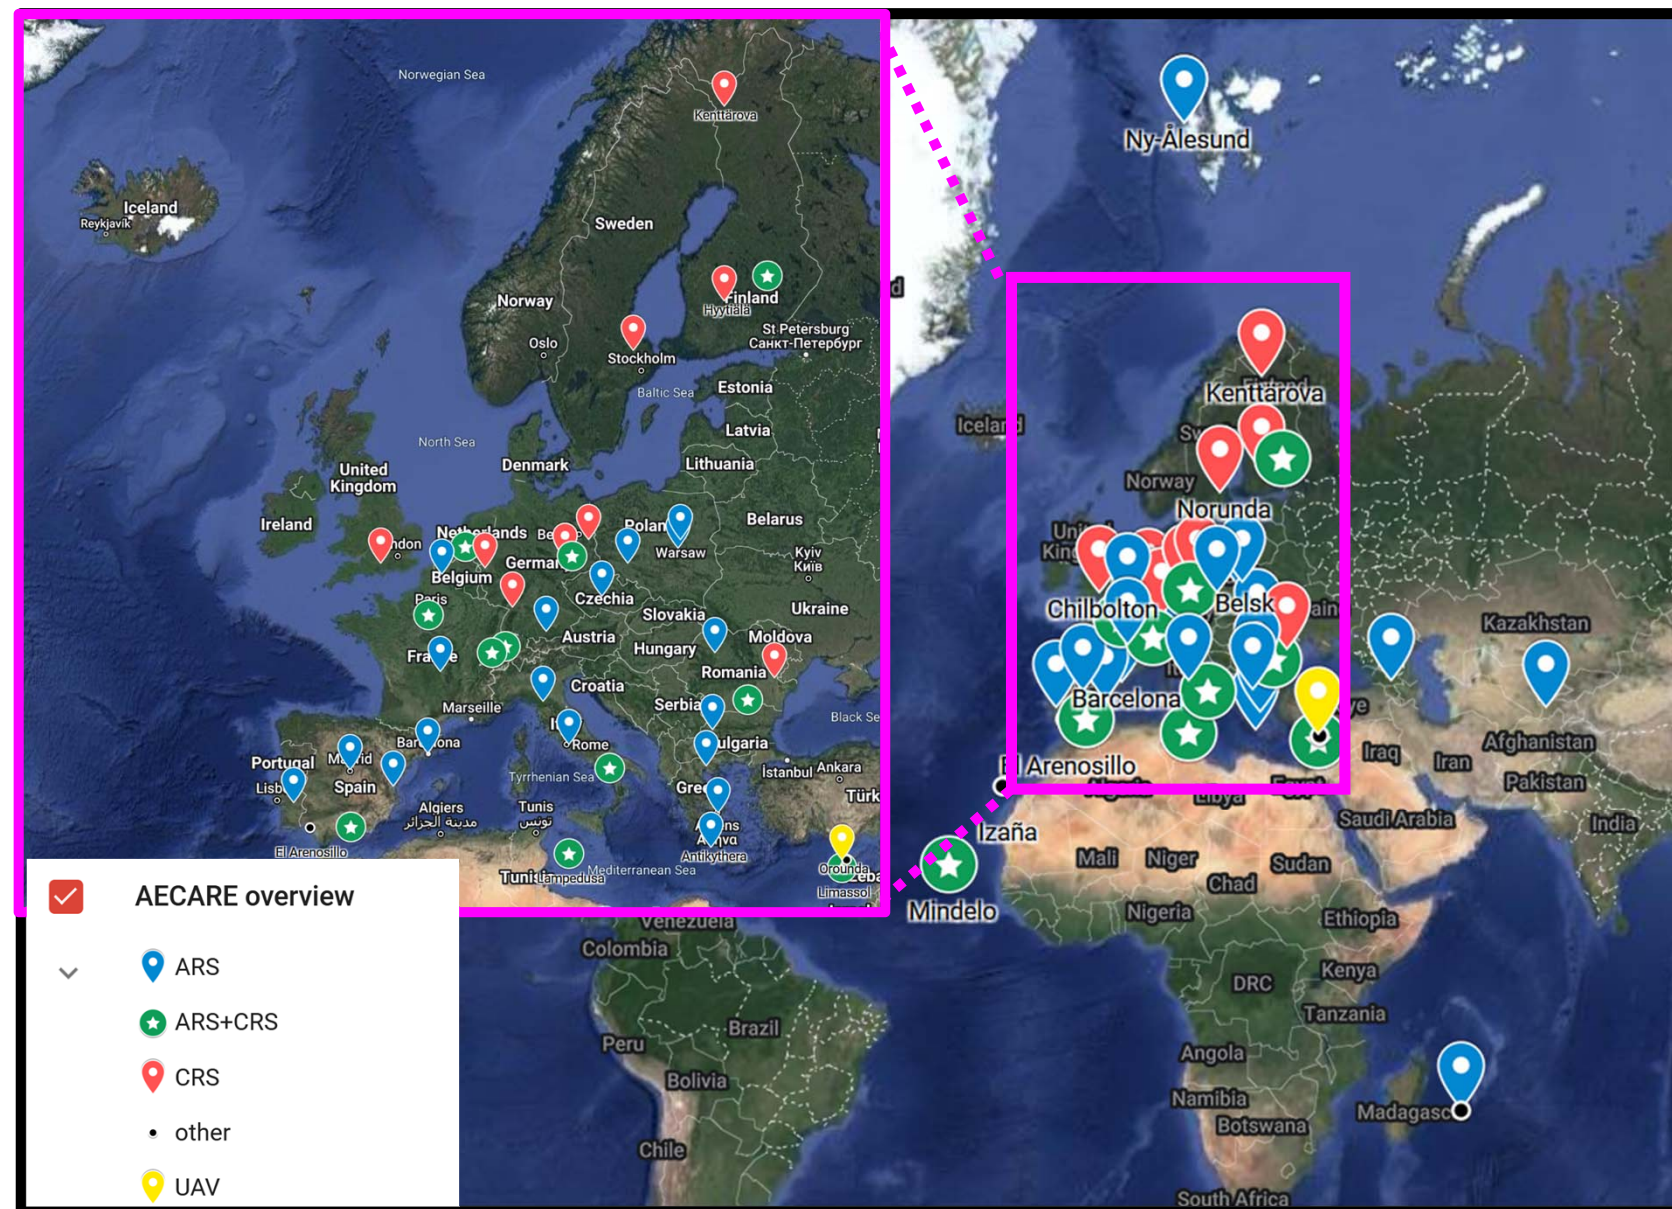

# Updates

## Changes in the project due to new infrastructure:

- Involvement of ACTRIS central facilities (data centers, topical centers) with centralized QA/QC and data flows
- New stations, new instrumentation, changing partners → updated consortium
- Change in Coordination: Arnoud Apituley → Holger Baars (with close involvement of many others)
- Funding of operation secured, but very limited for data analysis → **concentrate on data delivery to EVDC**
- Use of ATMO-ACCESS pilot activity (Trans National Access) to prepare validation activities and get limited funding

ARS = aerosol remote sensing (lidar+photometer)

CRS = cloud remote sensing (radar+MWR+ceilometer+disdrometer+..)
