

## Myopia Management: Putting It Into Practice

12<sup>th</sup> of February 2022

### Some of our speakers

**Ariolfo Vasquez, OD**, is an optometrist from the Universidad de la Salle Bogota Colombia, based in Cuenca Ecuador, South America, IMI Ambassador for Latin America Region, Fellow of the International Association of Contact lens Educators (FIACLE); Fellow of the Scleral Lens Education Society (FSLs); co-founder of the LATAM Myopia Management Group. Specialist in contactology, special lenses, and myopia management, he is the Head of the Department of Contactology and Optometry at Oftalmolaser Eye Clinic, Cuenca-Ecuador, and Manager and owner of Centro Visual, Optocentro, Cuenca-Ecuador.

**Carmen Abesamis-Dichoso, OD**, is an optometric private practitioner in Makati City, Philippines. Her practice focuses on myopia management, specialty contact lens fitting for keratoconus, high myopia, high astigmatism, dry eye, irregular corneas and paediatric population. She has presented lectures in several countries in the Asia Pacific Region. She has also been invited to present lectures in Russia and Italy about myopia management and keratoconus. She has been awarded outstanding optometrist of the Optometric Association of the Philippines and has represented the World Council of Optometry at the World Health Organization meeting.

**Kate Gifford, BAppSc(Optom)Hons, PhD**, graduated from Queensland University of Technology (QUT) in 2003 with First Class Honours and a University Medal and was awarded her PhD in contact lens optics in myopia from QUT in 2018. Dr. Gifford is a clinician-scientist and peer educator based in Brisbane, Australia, and a co-founder of Myopiaprofile.com. She works in clinical practice and holds a visiting research fellow position at QUT and is the Committee Chair and lead author on the International Myopia Institute's Clinical Management Guidelines.

**Philip Cheng, BOptom**, is a clinical optometrist and director of The Myopia Clinic in Melbourne, Australia. Internationally recognised as a leading practitioner in myopia management, he has presented for Optometry Australia, the University of Melbourne, UNSW, the Global Myopia Symposium and the Asia-Pacific Myopia Management Symposium. He also regularly writes for industry publications to educate the public and eye care practitioners on myopia management. He has been involved as a key opinion leader for Essilor, Hoya and the Brien Holden Vision Institute. Philip is an experienced orthokeratology practitioner and a Fellow of the International Academy of Orthokeratology and Myopia Control.

**Justin Kwan, OD**, is a 2009 graduate of UC Berkeley School of Optometry and went on to do a contact lens and dry eye residency at Southern California College of Optometry. He taught and saw patients there for eight years before moving to Chicago in 2018, joining a private practice. In April 2020, he transitioned to CooperVision full time in the role of senior manager, myopia management. In his 12 year career, he has over 60 accepted abstracts and has given over 100 hours of continuing education. Dr. Kwan is the current president of the Chicago North Side Optometric Society, immediate past chair of the Fellows Doing Research SIG of the Academy, and a member of the Intrepid Eye Society

### Some of our speakers

**Sara McCullough, BOptom (Hons), PhD**, is a lecturer in Optometry and Vision Science at Ulster University. Her research interests include myopia and other refractive errors in childhood and she is a co-investigator on the Northern Ireland Childhood Errors of Refraction (NICER) study, the largest prospective study of eyes and vision in childhood in the UK and Ireland. The study aims to predict the refractive error outcome for a child depending on their family history, visual activity and ocular biometry to help inform clinicians of those individuals most at risk of developing significant refractive error, particularly myopia. Sara is also study coordinator for the first observational trial of the Hoya Miyosmart myopia management spectacles lenses in European children. She is a Research Advisor for The College of Optometrists, UK and an examiner and assessor for the College's Scheme for Registration.

**Thomas Aller, OD**, graduated from UC Berkeley School of Optometry and for 30 years he has been researching clinical methods for the control of myopia progression. After receiving the world's earliest patent for a method of myopia control, he began collaborating with Brien Holden and the Vision CRC on their myopia program and shares several patents with them.

Dr. Aller is a fellow of the British Contact Lens Association and an associate member of the International Society of Contact Lens Specialists. He is the 2018 recipient of the Award of Excellence from the Global Specialty Lens Symposium and the 2019 recipient of the Garland Clay Award from the American Academy of Optometry. Dr. Aller is a Visiting Scholar at UC Berkeley, a scientific and clinical advisor to Treehouse Eyes and consults with multiple companies developing devices and treatments for myopia.

**Wen Juan Chui, BOptom (Hons), MOptom**, inspired by the work of her father and with a keen interest in the sciences, Wen Juan chose the profession of Optometry and completed her undergraduate and postgraduate training at the University of New South Wales, Australia. After 5 years of practicing in Australia, she returned to the family practice in 2008 and is now seeing the third generation of patients. Practising full scope primary eye care and coming across many older myopic adults, have spurred her to have a special interest in managing myopia in young persons, knowing well that risks need to be mitigated for her patients' future eye health and vision. She has been a member of the Singapore Optometric Association since 2008 and is the current Vice-President.
