

Trends & Innovations shaping the future of Mining & Metals Industry

Vimal Gaba
Global Head Mining & Metals,
IBU Mill Products & Mining, SAP

Madrid, September 28th, 2022

Agenda

- **Industry Trends & Priorities**
- **SAP Strategy for the Intelligent Enterprise**
- **Solutions & Innovation Examples**

IBU Mill Products & Mining – Value chain view of industry coverage

Forest & Paper value chain

 <p>Forest Products</p> <ul style="list-style-type: none"> ▪ Forestry ▪ Logging ▪ Solid Wood ▪ Sawmills 	 <p>Pulp & Paper</p> <ul style="list-style-type: none"> ▪ Packaging paper ▪ Graphical paper ▪ Hygiene paper ▪ Pulp 	 <p>Packaging</p> <ul style="list-style-type: none"> ▪ Paper Packaging ▪ Flexibles Packaging ▪ Aluminum Packaging ▪ Glass Packaging, Plastic Films
---	--	--

Mining & Metals Value Chain

 <p>Mining & Beneficiation</p> <ul style="list-style-type: none"> ▪ Ferrous minerals ▪ Base, non-ferrous, ▪ Battery & energy transition mineral ▪ Coal Metallurgical & Thermal ▪ Precious & Industrial minerals ▪ Mining Services 	 <p>Metal Smelting & Refining</p> <ul style="list-style-type: none"> ▪ Iron & Steel ▪ Zinc, Aluminum ▪ Li, Ni, Copper, Cobalt, Rare Earth ▪ Coal, lignite, CBM ▪ Precious metals Gold, Diamon ▪ Metal scrap & recycling 	 <p>Downstream Manufacturing</p> <ul style="list-style-type: none"> ▪ Flats & Longs ▪ Rolled & Galvanized products ▪ Pipes & Tubes ▪ Cable & Wires ▪ Fabricated Metals ▪ Service Centers
--	---	--

Building Materials

 <p>Building Products</p> <ul style="list-style-type: none"> ▪ Flooring, roofing, windows ▪ Ceramics, glass, stone ▪ Wood, metal, plastic products ▪ Furniture 	 <p>Cement & Concrete</p> <ul style="list-style-type: none"> ▪ Cement ▪ Ready Mix ▪ Concrete Products
--	--

Textiles

 <p>Textiles</p> <ul style="list-style-type: none"> ▪ Yarn ▪ Fabric ▪ Carpet & Rugs
--

Mining & Metals today

Industry with strongly growing eminence for a low carbon future

Global Supply Chains

Demand growth with variability,
Supply Centers & (re)sources
Geopolitics

Sustainability & Environment

Social value, License, Risk
Green products & emissions
Regulations & disclosures

Shortages & Disruptions

Energy & Resources,
Supply Chain & shipping
Inflation & economic outlook

Energy & Mobility Transition

Megatrends drive major uplift
Investor focus, shifting portfolios, capex
Variable speeds of transitions

Innovation & Growth

Substitutes, alternates & new materials
Recycling & Circular networks
Build Consumer Trust

Technology & Data Innovations

Cloud, Digital, Cyber attacks
Blockchain, AR, VR, wearable.
Digital twins & data

Mining & Metals today

Industry with Shifting Business Priorities

Build Supply Chain Resilience

- Synchronize planning across levels
- Tracking, tracing & visibility
- Build intelligence in processes

Innovate in Assets & Operations

- Build Reliability & predictability in asset performance
- Data driven insights & innovation
- Digital twins & remote operations

Race up towards Sustainability

- Emissions, ESG , Regulations
- Safety & health
- Circularity

Drive Customer Centricity

- Customer channels & models (B2B, B2C, B2B2..marketplace)
- Experience & convenience
- Downstream trust

Collaboration & Networks

- Supply chain & ethical sourcing
- Value chain transparency & data exchange
- Networked process eg Assets

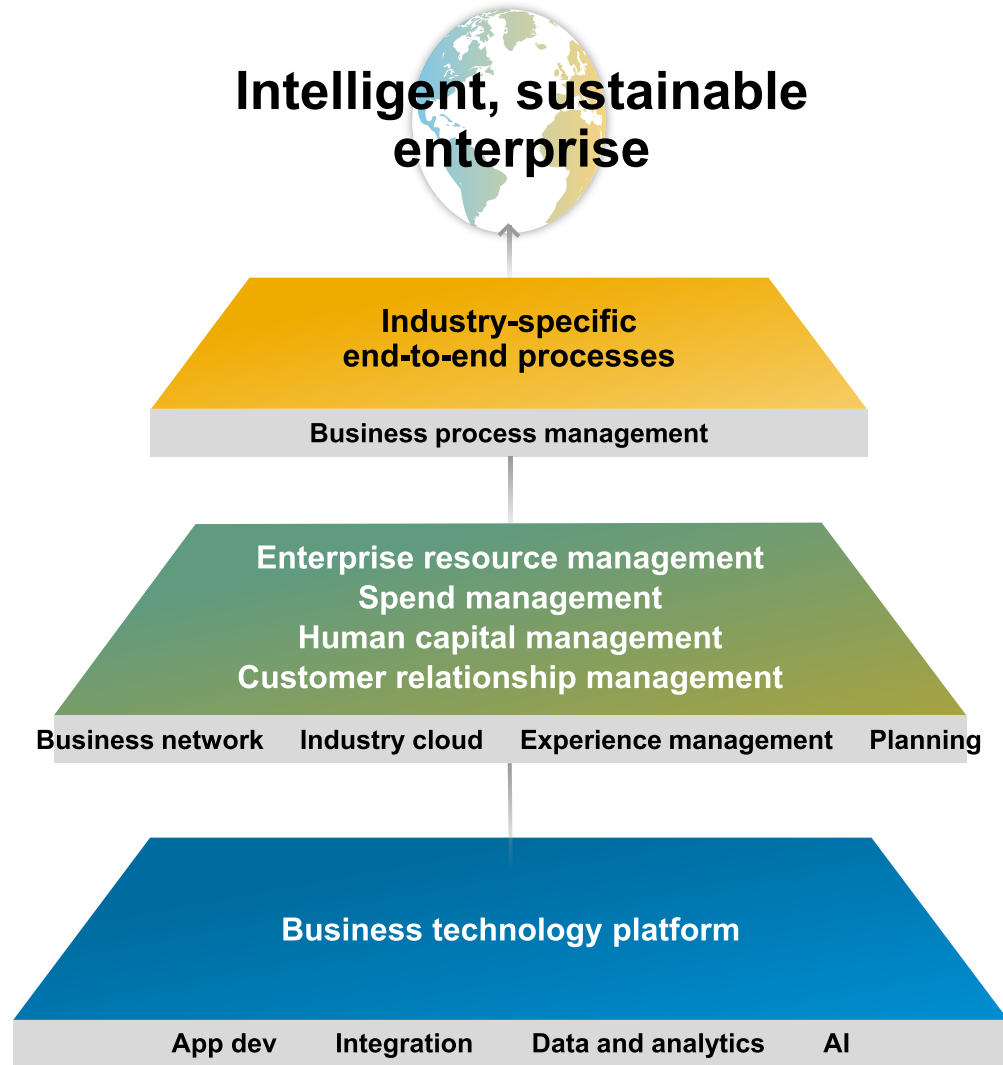

Agenda

- **Industry Trends & Priorities**
- **SAP Strategy for the Intelligent Enterprise**
- **Solutions & Innovation Examples**

SAP Vision for an Intelligent Enterprise

Enable & Support the Mining & Metals Industry

Expand business innovations with RISE

Mining Value Map 2022

	Commodity Supply Chain Management	Mine Operations	Sustainability
Human Resources	Long-Term Business Planning	Project and Portfolio Management	Corporate Sustainability and E-Accty
Finance	Customer Engagement	Mining and Processing	Environmental Footprint Management
Procurement Excellence	Sales, Purchase, and Shipment of Commodities	Asset Management	Holistic Steering and Reporting
Technology Platform	Non-Bulk Transportation Management	Warehouse Management	Environment, Health, and Safety
			Product Compliance

Human Resources	Gain Manual Resources and Control Delivery	Digitize and Optimize Resource Management	Asset Management & Leasing	Asset Allocation	Project Analytics	Compliance Experience Management
Finance	Forecast to Plan	Invoice-to-Cash	Risk Control	Financial Planning and Analysis	Forecast to Report	Travel to Homebase
Procurement Excellence	Source and Contract	Buy and Order Intake	Plan and Forecast	Central Procurement	Supplier and Risk Management	Buy and Order Direct Goods
Technology Platform	Buy and Order Services	Invoice and Pay	Procurement Analytics	Trustly Partner Collaboration		
	Analytics	Application Platform and Infrastructure	Customer and Data Engagement	Workflow, Tools/Integr.		

Metals(Mill Products) Value Map 2022

	Business Planning	Manufacturing and Asset Operations	Digital Logistics	Sustainability	Sustainable Customer Relationships

- Value chain transparency & data exchange
- Networked process eg Assets

Synchronized Planning with SAP Integrated Business Planning

Resilient supply chain

Synchronized Planning for Production

Synchronized Planning for Maintenance

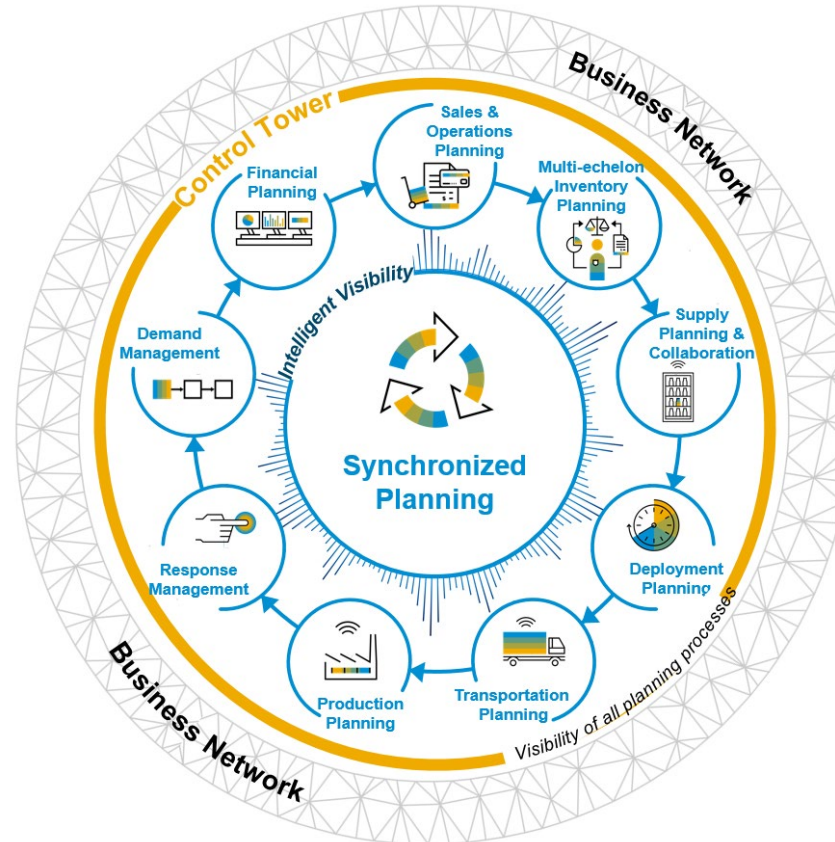

Extended Planning & Analysis with Financial Planning

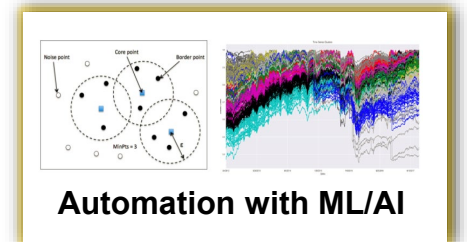

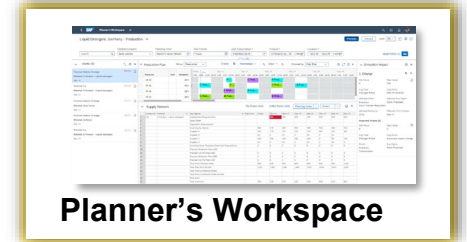

Synchronized Logistics Operations

Network Aware Planning

Focused Innovations

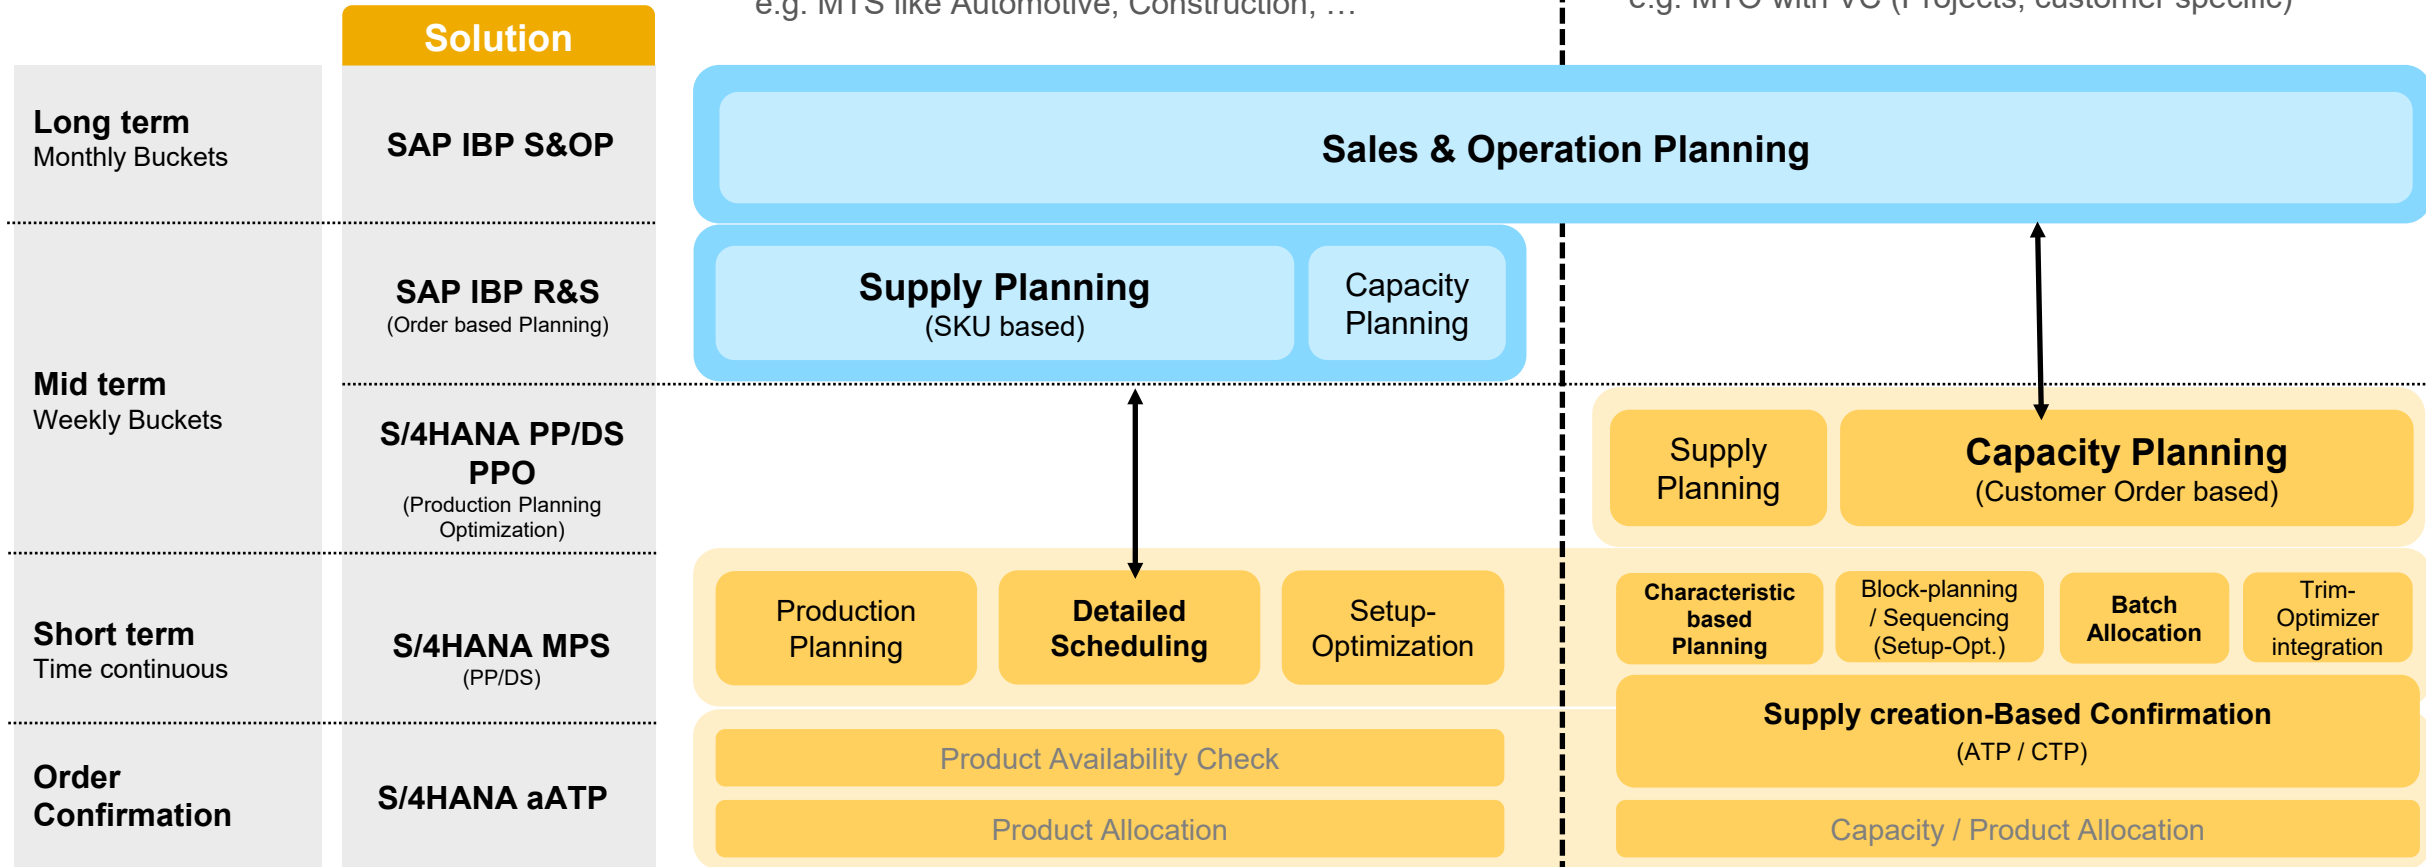

Synchronized Planning for Metals(Mill) Industry

Resilient supply chain

Supply Chain Centric Planning¹
 e.g. MTS like Automotive, Construction, ...

Manufacturing Centric Planning²
 e.g. MTO with VC (Projects, customer specific)

Planning approaches to address for different business requirements

The Intelligent Order Promising – S/4HANA advanced ATP

Resilient supply chain

Business Needs

- Customer Service Manager needs to confirm the delivery dates and quantities for online-received sales orders for make-to-order items based on the component and available capacity
- After Checking existing stock, Customer Service Manager wishes to schedule a production run and provide confirmation date to customer

Confirm MTO/ATO orders considering manufacturing constraints

SAP S/4HANA

Solution Highlights

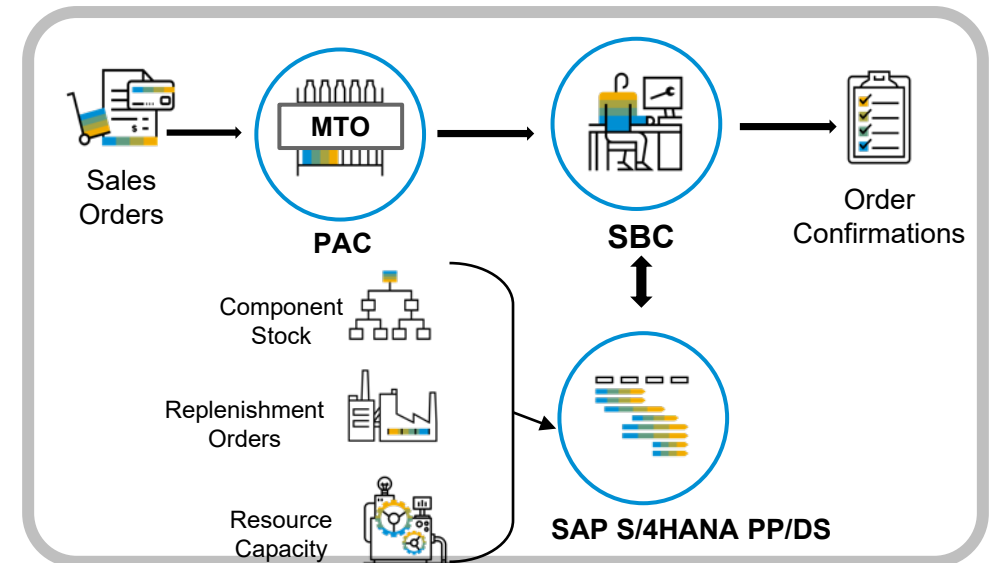

- Immediate interaction between Sales and Production
- Considers Resource capacity and component availability simultaneously
- During the aATP check, PP/DS is called at finished product level for multilevel demand and supply matching, supply planning, detailed scheduling and supply element creation*
- APO-MATP-like functionality with product availability check (PAC) only at component level **
- During sales order entry or change, an advanced Available-To-Promise (aATP) check can call a source for a Bill of Material (BOM) and routing explosion **

Business Benefits

- Manage shortage situations by leveraging production capacity
- Immediate confirmation results for make-to-order products
- Leverage finished goods inventory, production capacity, and component availability to achieve maximum Service levels

Supply-creation Based Confirmation (SBC)

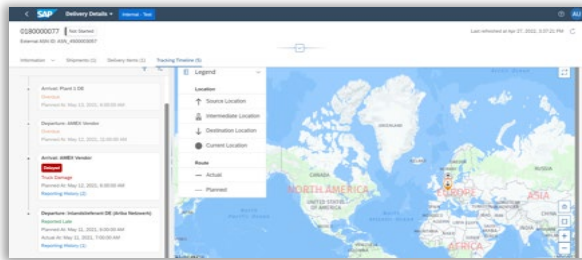

Solution & Innovation Examples with Industry Cloud

Resilient supply chain

SAP Business Network for Logistics,
global track and trace option

Capture, process & store tracking information

Industry Cloud- SAP Solution

- ✓ Track Shipments
- ✓ Monitor Inbound ASN
- ✓ Track Sales Order fulfillment
- ✓ Track Purchase Order fulfillment

- ✓ Users served with updated information: transportation planners, receiving specialists, internal sales representatives, and purchasers
- ✓ Supported modes of transport for visibility data integration: global ocean FCL, global air and FTL and LTL in NA and Europe

Descartes E-booking for Ocean shipment
management

Enable end-to-end ocean shipment
management and visibility for your supply chain

Industry Cloud- Partner Solution

- ✓ Expand ocean shipment capabilities, uniting multiple parties & processes together from contract to booking, through tracking & financial settlement lifecycle.
- ✓ Integrated ocean shipment management to unify & analyze supply chain data for ocean carriers.
- ✓ Integrated with the SAP Logistics Business Network

Building reliability in Asset performance

Assets & Operations

Asset Performance Management

Asset Strategy

Risk & Reliability Management

- Asset Risk and Criticality Assessment
- Asset Maintenance Strategy Definition
 - RCM, FMEA

Recommendation Management

- Asset Maintenance Plan Definition
- Recommendation Management
 - Intake (internal/ external), Editor

Asset Health

Maintenance Rules Management

- IoT-enabled asset monitoring
- Maintenance Rules Editor for business users
- Asset health scoring

AI-based Predictive Maintenance

- AI model management
- Failure curves and Remaining Useful Life
- Anomaly detection
- Failure predictions
- Custom AI/ML models

Performance Analytics

- Present asset reliability, asset health (including IoT), maintenance performance and financial data for analysis and decision support

Enterprise Asset Management / Maintenance & Service Operations

Planning & Orchestration

- Time- and Cycle-based Maintenance Plans
- Job Planning (Task details)
- Maintenance Demand Management

Scheduling & Dispatch

- Scheduling for Time-, Cycle- and On-Condition Maintenance
- Scheduling of Resources
- Dispatch and Supervision

Worker Safety (EH&S)

- Work Clearances & Permits
- Job Safety Briefings
- Exposure Tracking
- PPE

Execution & Reporting

- Provisioning of Tools and Parts
- Maintenance & Inspection documents
- Emergency Work

Enterprise Integration

- Asset lifecycle management (projects, fixed asset accounting), cost control (labor, parts, services)
- Supply Chain Management
- Human Resources

Asset Network & Collaboration

Mobile

 S/4HANA  Cloud

Rethinking spare parts planning in Mining Assets & Operations

Integration Content for Maintenance Plans

- Integration of Maintenance Plans and Asset Master Data from ECC & S/4 HANA EAM
- Integration content for **Master Data types and Key Figures** from Plant Maintenance (11 New MRO extractors and re-use of 12 Standard extractors with Filters.)

New MRO Planning Area

- Model Asset Intelligence data structures to IBP models. (Equipment's, Func. Locations, Assets, Maint. Activities..)
- Planning Operators and Key Figures for MRO Demand and Supply Planning Processes
- Financial Key Figures for Total Maintenance Costs

SAP IBP for MRO
(Maintenance, Repair and Operations)

DataSource	Ver	Long Description	Ext. Meth.	Provider
/IBP/LOCATIONPRODUCT_ATTR	A	IBP Location Product Attributes	F1	/IBP/S_E
/IBP/MRO_EQUIPMENT_ATTR	A	MRO Equipment attributes	F1	/IBP/S_M
/IBP/MRO_EQUIPMENT_TEXT	A	MRO Equipment texts	F1	/IBP/S_M

MRO Demand and Supply Planning Processes

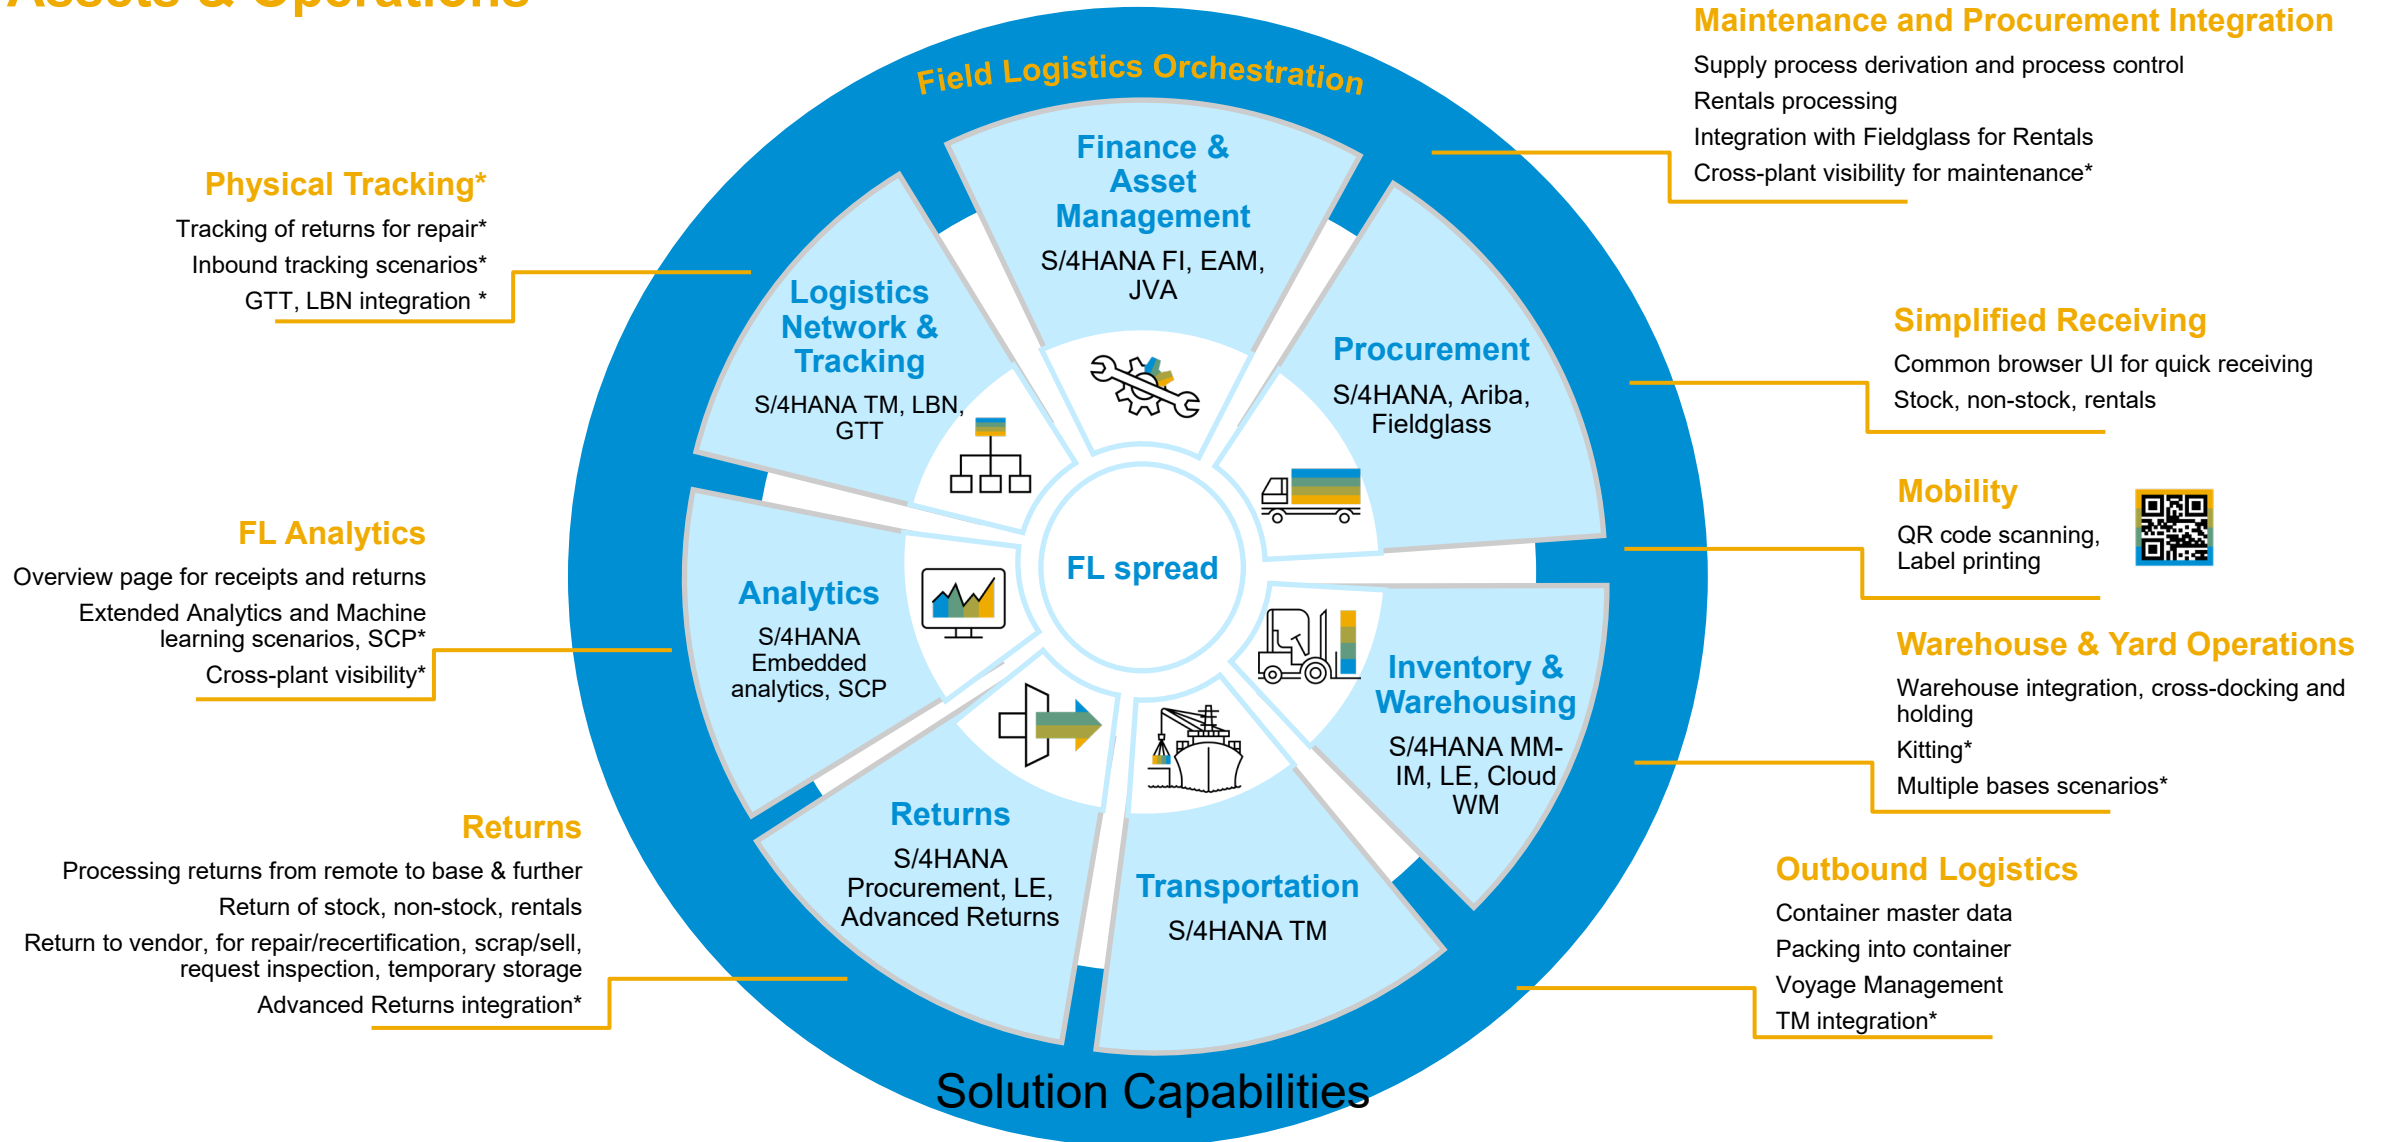

- Forecasting Corrective and Preventive Maintenance
- Rough Cut Workforce Capacity Plan and Spares Usage of Maintenance Plans

Co-innovation topic

IBP 2202R & 2205R

Field Logistics with SAP S/4HANA (scenario for Mining)

Assets & Operations

Solution & Innovation Examples with Industry Cloud

Assets & Operations

Asint- Risk Based Inspection (A native App within the SAP IAM suite)

A Risk Based Inspection (RBI) approach allows the operator to prioritize inspection plan based on the prediction of failure versus traditional time-based or condition based inspection plan.

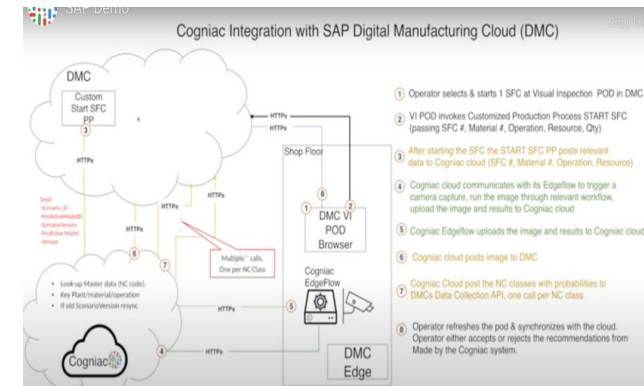

More Information
Visit: [SAP AppStore](#)

Cogniac- Visual operational intelligence frontline

Drive massive value from visual assets to realize process performance improvements, integrating with any existing camera infrastructure and workflow in any environment, also integrating with SAP Digital Manufacturing Cloud,

Industry Cloud-Partner Solutions

CPQ with Advanced Variant Configuration & pricing service for Metals

Drive Customer Centricity

CPQ (Configure, Price & Quote)

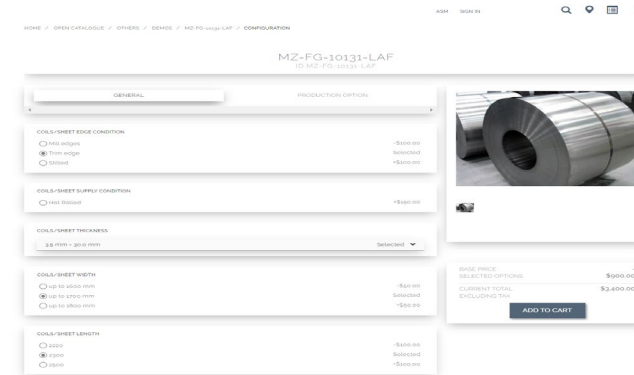

- Connected omni-channel quote-cash
- Single shared source of product, configuration, and pricing data with back office integration- S/4HANA, VC /AVC, CPQ, Commerce Cloud

Configuration & Pricing Service-

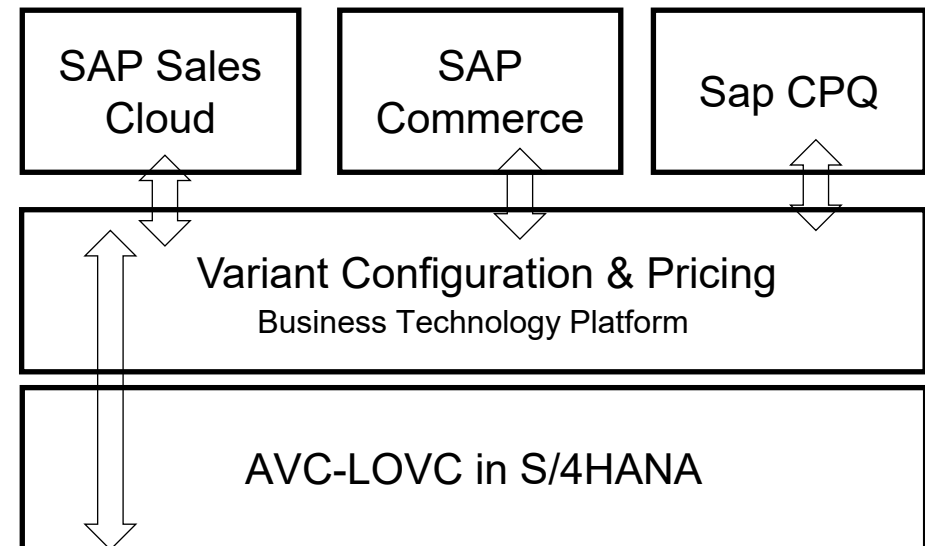

- One Configuration Service on SAP BTP – Consumer does not need to know whether it is a VC or AVC model
- Same dependency processing by Configuration Service and S/4HANA backend for AVC models – no deltas

AVC

- Support of multi level scenario for configurable materials
- Engineer to order for configured products
- aATP product allocation with VC Characteristic

Model once configure anywhere

Solution & Innovation Examples in Metals

Drive Customer Centricity

Transform online sales of materials

Modernization and transformation of the whole company by tackling new approaches on several levels

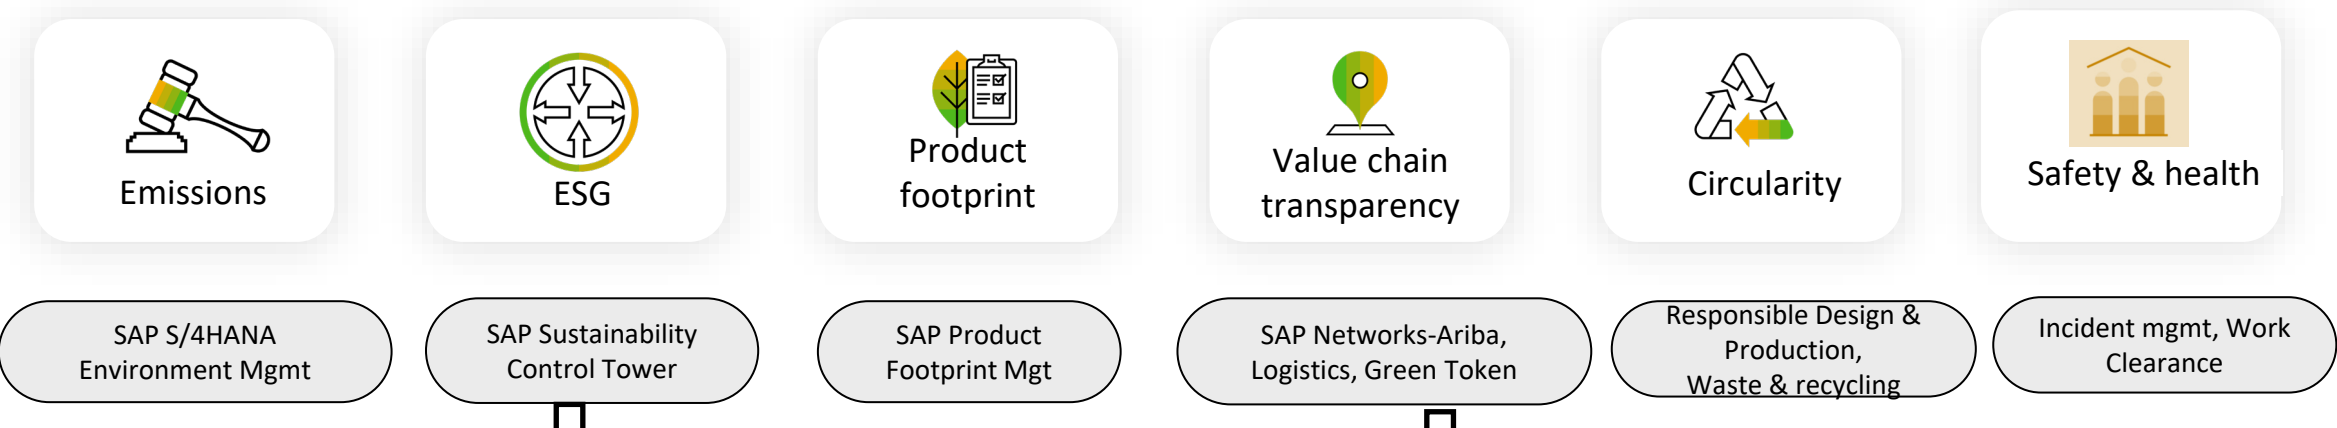

With the implementation of the omni-channel capabilities, sales can now serve customers in an integrated augmented way

-
- Align with a new transformation strategy: that puts customer orientation front and center
 - Improved way of working: Quoting and pricing, customer history, time freed for better consulting of customers
 - Modern e-commerce and Omni-channel offering for customer
 - Secure & seamless Integration of customer portal & insight sales

SAP Innovation Award

Building blocks & big picture supporting Mining & Metals

Sustainability

Sustainability Control Tower

Industry Cloud- Partner Solution

Incorporate the 'green line' into strategic decision making

- Manual and automated data collection capabilities, including quality/feasibility checks and approval steps
- Pre-shipped data models to support established reporting frameworks (GRI, SASB, WEF IBC...) alongside customer specific adaptations
- Automated reports supporting both internal & external publishing (statutory and voluntary)

KPI Assessment Service from SAP - Identification of frameworks & initial KPIs for corporate sustainability reporting

SAP® Ariba – Ecovadis Supplier Sustainability Rating

Manage Supplier Sustainability Risk, Performance & Improvement

- Integration with Sustainability Risk & Performance allows to view suppliers' sustainability scores, and access full scorecards - from SAP Ariba Supplier Risk
- Full 360 view of ratings and monitoring.

More Information

Solution & Innovation Examples

Sustainability

Providing confidence and consistency to manage climate impact

SAP S/4 HANA Environment Management

- Needed a consistent, auditable, and transparent process to capture and report global emissions monthly, from 35 global plants.
- Data collection, for emissions management was a challenging topic – varying greatly across plants, with lots of manual input, no automatic generation & lots of errors & inaccuracies.

[Watch Customer Interview](#)

Powering Battery-Operated Mobility and a Cleaner, Greener Planet

ecobat

RISE with SAP, SAP S/4HANA Cloud, SAP Analytics Cloud

- Closed-loop manufacturing that helps ensure toxic materials, such as lead and lithium, are continually reused & don't end up in landfills
- Replacement of legacy IT environment in order to fully connect supply chains and customers

[More Information](#)
Visit: [here](#)

Collaborate & orchestrate processes across company boundaries

Business networks

Supply Chain Collaboration

- Visibility across E2E supply chain
- Seamless trading partner collaboration
- Forecast & Inventory collaboration

Procurement Collaboration

- Visibility across procurement process
- Trading partner search and directory
- Regulatory compliance

Logistics Collaboration

- Visibility across logistics supply chain
- Freight collaboration
- Material Traceability

Asset Collaboration

- 360° asset visibility
- Full asset reliability
- Collaborative maintenance & service

Industry Cloud

SAP LBN Material traceability

- Use of Blockchain technology to capture multi-component provenance thus enabling in-depth analysis of product genealogy
- Data sharing across n-tier supplier network to improve end-to-end visibility & alerts

SAP Logistics Business Network, Material Traceability Option

Other network use case & examples

- Collaborative asset maintenance
- MRO supply chains (Inbound)
- Collaborative planning -IBP & Ariba Supplier Risk
- Carbon & sustainability data
- Auto network (Catena X)

Mining & Metals- Summary

- ✓ Industry focused direction
- ✓ Ongoing investments in SAP solutions
- ✓ Growing Industry cloud portfolio
- ✓ Active engagement with Partners to identify value-adding applications
- ✓ Various influence channels for customers
- ✓ Comprehensive industry roadmap

Road Map Priorities

Operational ERP for Mill Products in the public cloud
Discover a complete intelligent ERP system for the Mill Products industry with built-in intelligent technologies, including AI, machine learning, and advanced analytics addressing the industry and the country-specific.

- Advanced variant configuration – building in various order configurations
- Advanced variant configuration – extra grant configuration
- Recent-based production rates in repetitive manufacturing

[Show on Road Map](#)

Run in a highly automated fashion to ensure operational efficiency
Companies must invest in an automated factory to achieve operational efficiency and tightly integrate with their networks of supply and demand. This will require increased automation throughout all processes, not just on the shop floor.

- Advanced machine learning services for visual inspection on the shop floor
- Plan and configure the full network of systems and around the shop

[Show on Road Map](#)

State-of-the-art configuration engine leveraging Cloud capabilities
Enhance your material definition and streamline order fulfillment processes across all lines of business. Use a new, advanced variant configurator that lets you customize notes, drawings, production, and engineering with process and data integration. Advanced Variant Configuration supports make-to-stock, customer using material variants and other.

- Advanced variant configuration – extension of existing information

SAP Roadmap for Mill Products (Metals)

[Roadmap Explorer](#)

Road Map Priorities

Operational ERP for Mining in the public cloud
Discover a complete intelligent ERP system for the Mining industry with built-in intelligent technologies, including AI, machine learning, and advanced analytics addressing the industry and the country-specific.

- Display of the external system for materials from SAP Ariba Contracts ...
- Planning and dispatching of repair technicians with SAP Field Service...
- Business process scheduling for logistics

[Show on Road Map](#)

Process automation by applying intelligent technologies on the SAP platform
Intelligent Enterprises are integrated enterprises that use data to feed their intelligence. Companies can become Intelligent Enterprises by integrating data and processes, and by using technologies such as advanced analytics, blockchain, and robotic process automation. Through these technologies they can gain a deeper understanding of their business and build resilient value chains. It will help them automate repetitive processes so that employees can free capacity and better focus on value generating work.

- End-to-end reconciliation in contract accounting and invoicing
