

International Conference on Cyber Security & Data Protection, presented by SAP and TAC Events

Business-Centered Access Governance and Security

5 – 6 October 2022, Dublin, Ireland

JOIN US IN DUBLIN

As world events continue to change and evolve, securely managing access to your critical enterprise applications and sensitive information has become both more challenging and more business-critical than ever before.

TAC Events and SAP are delighted to make a return to in-person conferences and cannot wait to welcome you onsite in the famously friendly city of Dublin for this unique community event.

Best regards,

Vincent Doux

HEAR REAL LIFE CASE STUDIES FROM

WORKSHOPS

WEDNESDAY 5 OCTOBER

During the pre-conference workshops you will have an opportunity to review functionalities, dive deeper into topics, get practical examples, take part in discussions, go through online demonstrations, and determine the business benefits available from SAP. Each workshop provides you with a unique opportunity to address challenges, discuss them with your peers, and gain valuable guidance from some of the most knowledgeable SAP cyber security, access governance and data protection experts

All workshops take place on the morning of Wednesday 5 October. Please note that you cannot switch between parallel workshops. You can find out more information on workshop fees under [Tickets & Offers](#) on the event website.

Pre-Conference Workshops (09:00 – 12:30)

Cybersecurity with SAP Solutions for Access Governance, Cybersecurity and Data Protection

Attend this workshop to gain an understanding of the value you can get from SAP solutions for Access Governance, Cybersecurity and Data Protection. Discover how can you add additional layers to the security model of your applications and where will it make the most sense.

The first part of this workshop will include high level presentations of the different solutions as well as demonstrations of the software. Workshop leaders will share tips and user experience as well as sharing demos of the SAP solutions.

Part two will cover how to reduce “insider threat” by securing access to sensitive data. In this section you will gain an understanding of how you can reduce the insider threat within your organization by implementing a UI logging and masking approach and putting in place a cyber security cockpit to prevent and deter attack patterns. To illustrate this session, the workshop leaders will also go over a war gaming exercise! So, will you be team red or team blue?

Facilitated By: Vincent Doux, SAP | Tobias Keller, SAP | Arndt Lingscheid, SAP

The Three Hottest Topics for You and Your CISO

Join this three part workshop to learn how to best create a business case for your cybersecurity and data protection, learn about access governance in the Cloud age and discover why cybersecurity is not just an IT issue.

Part One: Making the Case for Your Cybersecurity and Data Protection

Attend this session to come away with practical tips on how to create a business case for your Cybersecurity and Data Protection solutions.

Part Two: Access Governance in the Cloud Age

It is safe to say that, for the majority of companies, the Cloud age is in full swing. However, the adoption of multiple Cloud solutions has also led to many different authorization models, a lack of an holistic overview of access and many fragmented processes for governing compliant access to employees and third party workers. Attend this session to learn how companies can best tackle this challenge and provide secure and compliant access to data and systems, regardless if it is on-premise, Cloud or in a mixed mode. The session will highlight live examples, provide recommendations for a phased approach and outline the current capabilities in SAP's Cloud solutions.

Part Three: Cybersecurity is Not Just an IT Issue - Embedding IT Risk and Control in ERM

Attend this session to get practical tips on how to follow NIST's latest recommendations and “merge” your cyber risks into your ERM framework for a unified, single view of business risks. This will help you in not only ensuring compliance, but also in implementing a best practice approach.

Facilitated By: Gabriele Fiata, SAP | Peter Whibley, SAP | Gero Maeder, SAP

AGENDA

WEDNESDAY, 5 OCTOBER 2022

09:00 – 12:30	Optional Pre-conference Workshops
12:30	Conference Registration and Lunch
13:30	SAP and TAC Events Welcome and Opening Remarks Vincent Doux & Natascha Lalor, SAP
13:55	Welcome from our Platinum Sponsor Mick Roche, Deloitte
14:00	SAP Cloud Security: Why Thousands of Organizations Trust SAP to Protect their Data Moving to cloud-based solutions brings many benefits, but organizations need to be able to trust their cloud service provider. In this opening keynote, Jon Longstaff will talk about some of the security challenges in moving to cloud technology and the ways SAP works with customers to protect their data. Jon Longstaff, SAP
14:30	Threat Detection and Dashboard Overview of SAP Security Posture A growing SAP landscape often leads to an increased exposure to cyber threats and consequently an increasing need for threat detection and continuous monitoring. This session will cover pressing cybersecurity challenges that today's organizations are facing in their SAP systems: <ul style="list-style-type: none">• SAP systems have multiple types of logs which do not have a standardized format or structure: some are stored as log files in OS and others are stored in standard SAP database tables• SAP systems often have hundreds of concurrent users that generate thousands of events logs that can raise up to a high volume of data in a short period of time which must be quickly transferred• Monitoring and maintaining many interfaces between SAP systems, SIEM platforms and log retention policies have a high cost in terms of effort and complexity• Lack/Low level of awareness by the organization's top management regarding the SAP system's state, leading to a lack of appropriate and swift remediation actions being taken in a prioritized manner according to a defined compliance level Ivo Rosa, EDP & André Sousa, Deloitte
15:05	The Journey of Establishing SAP Enterprise Threat Detection (ETD) at Boehringer Ingelheim Boehringer Ingelheim invested time and effort in order to build a security baseline in order to be protected against cyber-attacks. SAP Enterprise Threat Detection, a SAP SIEM Solution, offered the pharmaceutical company the possibility to minimize these risks, since it gave them chance to react on time. During the session, Boehringer Ingelheim will share their experience of SAP Security Excellence Initiatives alongside insights into the ETD implementation project and operations, as well as lessons learned and tips to plan and run a successful implementation of ETD. <ul style="list-style-type: none">• State of the art SAP security at Boehringer Ingelheim• The journey of SAP Enterprise Threat Detection (ETD) at Boehringer Ingelheim• Lessons learned and tips for a successful ETD Implementation Ujjwal Prakash & Clara Salvador Roda, Boehringer Ingelheim
15:40	Networking Refreshment Break

AGENDA

WEDNESDAY 5 OCTOBER 2022

16:20

Getting Ready for a Sustainable Hybrid SAP IAM Landscape

An innovative approach to a new modern SAP IAM landscape for managing cloud and on-premise systems based on existing SAP solutions like Identity Authentication, Identity Provisioning, SAP IdM and SAP GRC, complimented with an end-to-end Fiori interface, which hides the complexity “under the hood” and provides a delightful user experience.

- Hybrid onboarding process
- Fiori-based approval workflow
- Business role management
- Mass requests processing
- Reporting

Ines Gawehn, GETINGE & Todor Petrov, ROIABLE

16:55

Segregation of Duties Beyond the ERP

During this session, it will be explained how to extend SAP GRC ARA in order to monitor the Segregation of Duties (SoD) not only for the ERP, but also across other applications, while the SoD conflicts are addressed proactively through IGA software integration and reactively through extended reporting capabilities.

- SoD main concepts: proactive vs reactive
- How to extend the segregation of duties beyond the ERP
- SoD integration with Identity Governance and administration tools
- How to leverage SoD data to get insights

Samuel López, Holcim Digital Center

17:30

Evolution of SAP Security Access Control in Kerry

Explaining the process of implementing and evolving the SAP Access Request process in Kerry, this session takes a look into the challenges faced, the requirements analyzed and how Kerry Group implemented SAP GRC into their landscape to reach the set up they have today.

- The beginning of Kerry Group’s SAP Access Request process
- Transition to SAP GRC Access Control
- Consolidated process with Service Now
- Lessons learned on the way
- Challenges and future objectives

Guillermo Casado, Kerry Group

AGENDA

WEDNESDAY 5 OCTOBER 2022

18:05 **Zero Trust Security – A Session of SAP Solutions for Identity & Access Management and Cybersecurity & Data Protection Supporting this Strategy**

Zero Trust Security is a cyber security strategy based on the fact that no user, program or IT asset should be de facto trusted – even if it's located within the four walls of the company. It is designed to protect the organization from outside and inside with dedicated processes and policies for access control and threat monitoring. SAP already offers many solutions for Identity & Access Management and Cyber Security & Data Protection that support this model, so attend this session to hear from Arndt Lingscheid, Solution Owner, SAP solutions for cyber security and data protection, on how you can leverage these solutions but also what's new and how you can benefit recent enhancements to protect your valuable data and infrastructure.

Arndt Lingscheid, SAP

18:35 **Day One Wrap Up**

Vincent Doux & Natascha Lalor, SAP

18:40 - 19:40 **Evening Networking Reception**

Following the last session of the conference, join us at our onsite networking reception to absorb the day's learnings and connect with other attendees over a wind-down drink, and delicious canapes.

AGENDA

THURSDAY 6 OCTOBER 2022

08:30	Registration and Welcome Refreshments
09:00	Welcome Back from the Chairpersons Vincent Doux & Natascha Lalor, SAP
09:15	Extending Zero Trust, Data Protection and Regulatory Compliance to the Cloud With SAP Data Custodian Zero trust approaches to data protection assume that every data access is a potential risk. That every data access should be monitored and authenticated. As cloud adoption accelerates, SAP's customers are faced with a number of challenges; <ul style="list-style-type: none">• How do I extend zero trust methodologies to the public cloud and to infrastructures managed by third parties?• How can I take advantage of the benefits of the public cloud, yet still protect and control my business data?• How do I comply with global data protection regulations such as GDPR and Schrems II if I don't know where my data is located and who is accessing it? In this session you will see how SAP Data Custodian is helping to protect SAP customer data and extend zero trust to the cloud using features such as Data Residency Control, Data Discovery, Customer Controlled Encryption Keys, Tokenization and Contextual (including user geolocation) Access Control. Peter Whibley, SAP
9:50	How Ingka Embedded Privacy by Design into its People and Culture Transformation Powered by SuccessFactors Ingka Group is made up of IKEA retail, Ingka Centers and Ingka investments. With 367 stores in 32 countries and 165,300 coworkers, it needed to make sure that its implementation of SAP SuccessFactors embedded privacy and security by design during a period of significant regulatory change. The ongoing multi-year program included a global template design, localization and roll out. In the session Ingka will share the Data Privacy and Security workstream lessons learnt. <ul style="list-style-type: none">• They wanted a partner to be there for them throughout the engagement and not just a library of controls• Embedding Privacy by design in every sprint of every workstream• SuccessFactors enabled data privacy• Managing the complex multi country data transfers and ensuring that the relevant policies were adhered too• The pace of regulatory change (especially in China, USA and Europe) Laurits Ketscher, Ingka Group & Gavin Campbell, Deloitte
10:25	GDPR Application Rules on Personnel Data of External Company Agents Through SAP UI Masking This session will elaborate on why ArcelorMittal chose SAP UI Masking as the tool to cover their business requirements. The IT implementation track of the business steered UI masking logic (analyze, design, implement) will be discussed, alongside key milestones and possible pitfalls during the implementation track. <ul style="list-style-type: none">• AM Business Compliance rules, including GDPR rules regarding visibility on personalized performance figures• Presentation of the applied rules in SAP Gui and FIORI• UI masking – team member roles and expected implementation lead time• Translating business steered rules into a parameterized UI masking design• Implementing UI masking rule logic as a base for SAP Gui and Fiori UI Masking• Key milestones, pitfalls and tips Valerie De Backer & Martial Lieven, ArcelorMittal
11:00	Morning Refreshment Break

AGENDA

THURSDAY 6 OCTOBER 2022

-
- 11:30** **Everything You Always Wanted to Ask About Cyber Security and Data Protection**
Attend this interactive discussion with SAP's business experts on cyber security and data protection and ask your burning questions directly.
While this format will not allow for individual customer-specific technical advice, it is intended to be an open mic to share questions and ideas on industry benchmarks, lessons learned, business benefits, quick wins, best practices... as well as getting insights on how companies are planning to build robust security measures to identify, analyze, and neutralize cyberattacks in their applications as they happen and before serious damage occurs. Learn, get inspired, and craft a successful cyber security and data protection practice within your organization.
Panel: Bo Baade-Pedersen, Vincent Doux, Gabriele Fiata, Michael Heckner, Jon Longstaff, Peter Whibley, SAP
-
- 12:00** **SAP Cyber Security, IAM and Data Protection: What's New?**
Attend this interactive session to get a quick orientation about SAP roadmap and select recent enhancements delivered in SAP solutions for Identity & Access Management and cyber security and data protection. Organized as an open format, this is your chance to interact directly with the leaders of the GRC solutions at SAP.
Panel: Arndt Lingscheid, Tobias Keller & Gero Maeder, SAP
-
- 12:30** **Networking Lunch Break**
-
- 14:00** **Vestas' Journey Towards a Compliant Hybrid Security Model**
The digitalization journey and a complex role architecture with increased demand for security and compliance, were some of the challenges Vestas was facing. This presentation is about how Vestas addressed these challenges by involving the many stakeholders across the organization, leveraging on SAP IdM and SAP GRC and establishing centralized IGA in a hybrid landscape.
- Implementation of SAP IdM/GRC 12 and integration with SuccessFactors as source of identities
 - Identity and access management in a hybrid landscape
 - Business role concept and automatic assignment based on employee master data
 - Usage of custom rulesets for GRC access risk analysis
 - Design authorization concept aligned with the rulesets to eliminate SoD conflicts and control critical access
 - Delivering the right balance between compliance requirements, user experience and technical complexity
- Cristina S. Jensen, Former Vestas Wind Systems & Francis Adrian Panilla, Vestas Wind Systems
-
- 14:35** **Managing Access Governance on SAP On-Premise and Cloud Systems – A Perspective from a Global Telco**
Vodafone has built an in-house team to manage their SAP Authorizations and Access Governance to establish the 'least access' principle. During the session, Vodafone will share its experience managing a large and complex SAP S/4HANA landscape and insights on running business operations while scaling the GRC capabilities and planning for the future. The session will pan out Vodafone's GRC story with a focus on the following:
- Running in-house GRC Function – Key Learnings
 - Adopting the Three Lines of Defence Model for SAP Security and Data Production
 - Bridging the gap between Business and Technology Functions
- Sukhdeep Singh, Vodafone
-

AGENDA

THURSDAY 6 OCTOBER 2022

15:10

The Nightmare for Cyber of Subscribers on Fiber

A fun look at cyber security challenges of the past, present and future. Have we adequate protection against the challenges we faced 20 years ago? Today's challenges? What about the future? Innovation continues to accelerate and companies need to be forward looking ... but what can we expect?

- A look back
- A look around
- Looking to the future ...

Chris Johnston, SAP

15:45

Close of Day Two, End of Conference

PLATINUM SPONSOR

Deloitte.

Deloitte

The Deloitte global SAP alliance can help you break every boundary and overcome the obstacles that stand between you and your vision for the enterprise. We bring deep industry experience at the intersection of business transformation and technology enablement, a global network of 26,000 SAP-focused professionals; end-to-end transformation capabilities and solutions; and an extensive track record of delivering the outcomes that matter. Discover how Deloitte can help you shatter expectations with the built-to-evolve Kinetic Enterprise™, enable constant innovation, and grow.

For more information, please contact: SAP@deloitte.com

GOLD SPONSOR

ROIABLE

ROIABLE has a mission: to demystify security principles, applications and scenarios for SAP customers while make their IT landscapes actually work for them. We achieve that both through tailor-made services and own products complementing standard SAP software.

Our team loves contributing to the whole ecosystem. ROIABLE's freeware products are used by many companies. We never keep the knowledge hidden and we gladly provide advice.

ROIABLE's customers are some of the most famous brands in the world. However, we don't rank them by popularity. Successful outcomes for each one of them is what we promise and then deliver.

For more information, please visit: www.roiable.com

BRONZE SPONSOR

Turnkey Consulting

Turnkey Consulting is a specialist Integrated Risk Management, Identity and Access Management, and Cyber and Application Security company. We provide business consulting, implementation and managed services to help customers safeguard their application environments - covering both SAP and non-SAP systems. We focus on the delivery of specialised services in support of the areas of governance, risk and compliance (GRC) for enterprises of all sizes.

For more information, please visit: www.turnkeyconsulting.com

REGISTRATION FORM

International Conference on Cyber Security & Data Protection, presented by SAP and TAC Events

I would like to register for the

International Conference on Cyber Security & Data Protection, presented by SAP and TAC Events

5 – 6 October 2022, Dublin, Ireland

(Please complete clearly in BLOCK CAPITALS)

First Name	Last Name
Company	Job Title
Department	Street
City, State	Zip Code, Postal Code
Country	Phone
Industry Sector	E-mail
Date	Signature

Attendance format:

Digital In-Person

I wish to attend the following:

Conference (5 – 6 October)

Two Day Conference (5 – 6 October)

Evening Event (5 October – Open to in-person conference registrants only)

Pre-Conference Workshops (5 October) (In-Person Only)

- Morning Workshop (please select which session)
- Cybersecurity with SAP Solutions for Access Governance, Cybersecurity and Data Protection
- The Three Hottest Topics for You and Your CISO
