

WE BREATHE CLIMATE CHANGE

Policies that increase the ability to adapt to climate change and decrease vulnerability can serve as a protective shield for citizens' health

Heatwave guardians
Heat waves on the rise,
For our joy or our despair?
Action plans, our guide.

Shelters of care
Climate change takes toll,
Everyone deserves our care,
Hospitals stand strong.

Communities of care
Connections we need,
To face a warming planet,
Inclusion takes lead.

Seeds of wisdom
Education key,
Preparing for a hotter world,
Health and knowledge lead.

Breathable air
Let our breath be free,
This shall be our joy again.
Clean air for us all.

Bringing relief
Hot sun beats us down,
We need cooling of our skin,
Breathing easy now.

Oasis of green
Dense tree-cover shields,
Urban grey transforms to green,
Shaded shelter serene.

Oasis of blue
Urban heat soars high,
Blue spaces offer relief,
Water cools and soothes.
