

Background

The social key for sustainability: some examples of betting for applied social research

Critical contemp. issues

- Environment
- Sustainability
- Corporate performance
- ...

Needs to deal with complexity

- Urgent environm. action
- New science paradigm
- Mutual understanding between sciences
- Improving innovation processes
- Improving knowledge transf. processes
- ...

...But we are either failing... or we are too slow.

Objective

Inspiring truly transdisciplinary multi-actors pro-environmental proposals or projects, turning the focus to social elements

Methods

Case studies, good practices on new (old) values:

Participative urban governance

Bottom-up processes for decision taking in urban design: 'Wise city'.

Co-learning for football climate action

Participative multistakeholder co-learning platform'

'Environmental Fair Play'

- Humility
- Critical practice
- Transdisciplinarity
- Open minded
- Knowledge sharing
- Generosity

'Mining, governance and sustainability'

An editorial project... as a space for discussion... and as a 'handbook' for the sector as well.

Local knowledge for ecological restoration

TRAIN#ER: including local culture and society for updating Eco-rest educational and training programs.

COST: networking, transdisc., creativity for facing climate change and necessary urgent societal transformations.
