

Dr. Brenda De Gama, PhD, is a Senior Lecturer in Clinical Anatomy, in the School of Laboratory Medicine and Medical Sciences, a UKZN DRILL Postdoc Fellow (Health Research Ethics) in the College of Health Sciences and a science communicator. She has published in various aspects related to Gross Anatomy, Medical Education, and perspectives towards body donation. Her research team focuses on religio-cultural perspectives around body donation and how they impact the acquisition of cadaveric material for Medical Education. Other research areas are on indigenous knowledge and use of traditional medicine in urinary tract infections and schizophrenia. Her research on body donation is funded by the NRF Thuthuka Post-PhD track grant and DRILL funding. She has served as a Council member in the Anatomical Society of Southern Africa where she is a life member and is a Member of the Federative International Committee for Equality and Diversity in Anatomy (FICEDA) in the International Federation of Associations of Anatomists (IFAA).
