

Dr. Erin Hutchinson is a Senior lecturer and Head of the Morphological Anatomy Division of the School of Anatomical Sciences at the University of the Witwatersrand in Johannesburg, South Africa. She is also a member of the Anatomical Society of Southern Africa's (ASSA) Council as well as the editor of the ASSA newsletter and chair of the ASSA Terminology Committee. Erin has also actively contributed to the Terminologia Anthropologica, currently in development under the IFAA and is a member of the IFAA President's Emergent Anatomist Programme. She is actively involved in the training of Undergraduate and Postgraduate Therapeutic Sciences, Medical and Dentistry students. Her teaching interests span the fields of Morphological Anatomy, Craniofacial Embryology and Oral Biology. As a member of the Human Variation and Identification Research Unit (HVIRU) in the School of Anatomical Sciences, Erin's research is related to the development and growth of the Craniofacial Anatomy as well as its application within the clinical and forensic fields. She has authored articles in the fields of craniofacial development and growth, Forensic Anthropology and Anatomical Education, specifically highlighting the ethical acquisition of cadaveric remains for the teaching of Anatomy, having also supervised Postgraduate students within these fields of research.
