

Associate Professor Geney Gunston practiced at state institutions as a medical officer and research assistant before joining the Department of Human Biology (HUB). She completed an MPhil in Higher Education Studies and teaches undergraduate students in years 1-3 of the MBChB programme and postgraduate students in Clinical Anatomy. Her research interests include Clinical Anatomy, particularly related to the cardiovascular system, and Medical Education, with a focus on successful transitioning from secondary to tertiary education, promoting conceptual change in the teaching and learning of anatomy in order to promote clinical reasoning and the transfer to clinical examination. She is currently serving as Honorary Treasurer on the ASSA Council.
