What are cookies?

Cookies are small text files which are downloaded to your computer or mobile device when you visit a website or application. Your web browser (such as Internet Explorer, Mozilla Firefox or Google Chrome) then sends these cookies back to the website or application on each subsequent visit so that they can recognise you and remember things like personalised details or user preferences.

Cookies are very useful and do lots of different jobs which help to make your experience on websites as smooth as possible. For example, they help with security, let you move between web pages efficiently, remembering your preferences, and generally improving your experience.

Strictly necessary cookies

These cookies are essential in helping you to move around our website and to use features, such as accessing secure areas of the website. Without these cookies some services may not function. These cookies do not gather information about you that could be used for marketing or remembering where you've been on the internet.

We only use a cookie called EventsAIR which is used to provide you with a better navigational experience around our website and to remember your information while you make a booking. This information is retained for 12 hours after you have closed your browser.

How to manage your cookie settings

Most web browsers allow some control of most cookies through the browser settings. To find out more about cookies, including how to see what cookies have been set, visit www.aboutcookies.org or www.allaboutcookies.org.

Find out how to manage cookies on popular browsers:

- [Google Chrome](#)
- [Microsoft Edge](#)
- [Mozilla Firefox](#)
- [Microsoft Internet Explorer](#)
- [Opera](#)
- [Apple Safari](#)

To find information relating to other browsers, visit the browser developer's website.
